Lancaster Farming

Serving The Central and Southeastern Pennsylvania Areas

Vol. 20 No. 13 | Lancaster Farming, Saturday, February 8, 1975 | $2.00 Per Year

Tractors and other farm equipment stretched almost as far as the eye could see on Tuesday and Wednesday at Wenger's Farm Machinery sale in Myerstown. This year's sale again attracted buyers from as far west as Colorado. Carl Wenger, a partner in the firm, expects sales to be in the $1.3 million range, a hefty boost over last year's figure. (See story on page 12.)

Hamburger Sale Set by Area NFO

In a move to get higher prices for their cull cows, National Farmers Organization members in Dauphin and Perry Counties hope to sell some 12,000 pounds of lean hamburger on Monday off the backs of trucks in the parking lot of a shopping center just outside Harrisburg.

According to Gerald Charles, Perry County's NFO publicity chairman, the Harrisburg sale will mark the beginning of a nationwide NFO campaign to raise beef prices. Charles expects that there will be close to 1000 similar sales throughout the country in the next few weeks. Charles is a young dairy farmer from Liverpool.

This sale will be the second in which area NFO members will be retailing farm products directly to consumers The first sale was conducted during the Pennsylvania Farm Show, when the organization sold some 30,000 pounds of cheese off the back of a truck parked behind the main arena. They were selling five-pound blocks of cheese for $1 a pound, when they ran afoul of some Bureau of Weights and Measures regulations. The problem was straightened out after a few hours, and cheese sales resumed with accurately weighed packages. Some of the packages had been underweight, but some had been overweight, Charles noted.

Charles said they were very careful to check all the regulations required for Monday's sale. The cows were slaughtered last Tuesday in a federally-inspected packing house, the J V. Taylor Co. in

One Lady, 50,000 Chickens

by Dick Wanner

My grandmother used to keep a few chickens - sometimes they were Rhode Island Reds and sometimes they were Plymouths or Barred Rock - and she used to keep all the egg money, too. She had a scale to size the eggs, and whenever I started to fiddle with the scale's platform, or bend the indicator needle, she'd suggest that I play with something else. Usually I went for the treadle on the sewing machine. Fortunately, I don't think I ever caused my grandmother to spend any of her egg money on a new scale or a sewing machine - although I did break a butter churn once.

But all that, as they say, was a long time ago. Things have changed. I no longer ride the trolley from Ephrata to Akron to visit my grandmother. And there are very few grading scales left, or treadle sewing machines, and the chickens aren't red or gray, and no little kids throw cracked corn up in the air, in their grandmother's

How Not To Beet High Sugar Price

Could this be the year to plant sugar beets in Southeastern Pennsylvania? The climate's right, the soil is excellent, and the price of sugar, although it's dipped somewhat, is still at a near historic high.

There's no doubt that farmers here can grow sugar beets. "We can grow absolutely beautiful beets," we were told by James Eakin, chairman of Penn State's extension agronomy department. The question is not one of ability, it's of advisability. Should farmers here grow sugar beets?

"No," says Eakin, who is very sensitive about the subject of sugar beets. It is, in fact, one of his least favorite subjects, ranking right down there with Penn State's 1973 Sugar Bowl loss to Oklahoma. About ten years ago, Eakin was one of the prime movers behind an attempt to start a sugar beet industry in Pennsylvania Growers were lined up, a processing plant was available (even though it was in Maine), a quota was obtained, and details were worked out so that skilled Mexican-American laborers would be available for the exacting chore of thinning the crop.

But then the bottom dropped out of the sugar market, and the firm that owned the processing plant went bankrupt. Without a processing plant, let it be noted, there is just no sugar beet industry. Farmers who had planted a crop, most of them in Berks and Bucks Counties, lost money. Everyone connected with the effort swore off sugar beets forever, including Eakin.

"I worked harder on the sugar beet project than on any other project I've ever done," Eakin told Lancaster Farming. "And I'm still sorry we got pushed out of the beet market. But I'm not about to encourage anybody to grow sugar beets.

"This sugar market can correct itself very quickly. We've always had sugar coming out our ears, and that could happen again. If we make peace with Cuba, beet growers will be in big trouble. Beets can't compete with cane in terms of yield or

Linda Stuber

Area Youth Serves Honduran Natives

For an increasing number of young adults in today's world, service and a respect for their fellow man has led them to volunteer projects throughout numerous countries of the world.

One such young person is Linda Stuber, a native of Lancaster County who is serving as a medical volunteer in the Pinalejo Medical Clinic, Pinalejo Honduras.

Linda graduated from Ephrata Area High School in 1967 and following her graduation from Goldey Beacom Jr. College, worked as a secretary for an industry in the County.

Although Linda was happy in her work, she felt as if she needed to help other people in a way that she could best use her skills. As a member of Swamp United Church of Christ, Linda applied to the church's volunteer headquarters and was soon on her way to Honduras to serve as an administrative personnel in the Pinalejo Clinic.

The clinic is located in Pinalejo, a village of approximately 2000 people and is inland 1½ hours from the main city of San Pedro Sula.

Linda's job requires bookkeeping along with all of the administration work and typing. The center also has on staff one doctor, 1 nurse-midwife and 2 trained native girls who assist with the patients.

Along with the medical attention given to the patients, Linda explained that the clinic also trains young women who return to their own villages and care for the people.

"We train young girls who have been selected by their village people, in every aspect of health diagnosis and care."

"When they have finished their training, they are sent

Omaha Cattle

February 6

CATTLE — Compared with the previous week's close — Slaughter Steers 25-50 cents higher, Heifers 25 cents higher, instances 50 cents higher, the advance coming on storm shortened midweek supply in a scramble for numbers to meet immediate requirements. Cows 50-1.00 higher, some High-Utility and Commercial 1.25-1.50 higher. Bulls steady.

Four day receipts 17,800 as compared 22,000 previous week and 11,700 a year ago. Steers approximately 46 percent, heifers 37 percent, cows 15 percent.

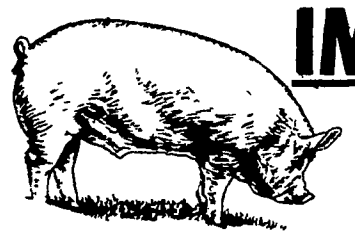
STEERS: At week's high time late, eight loads Choice and Prime 969-1248 lbs. relatively clean yield grade 3-4 36.75-37.00. Choice 975-1275 lbs. yield grade 2-4 closed 35.00-36.50, some mostly Choice but carrying a heavy coating of mud 34.00-34.75. During week few loads Choice 1350-1825 lbs. yield grade 3-5 39.0034.00. Mixed Good and Choice 950-1250 lbs. 34.25-35.25. Good 30.00-34.25. Standard and low-Good 28.00-29.50.

Average cost slaughter steers first three days 34.50 average weight 1117 lbs. as compared 34.37 and 1121 lbs. previous week and 47.78 and 1138 lbs. a year ago.

HEIFERS: Several loads and part loads Choice and Prime 975-1101 lbs. yield grade 3-4 35.50-35.75, part load 922 lbs. yield grade 3 36.00. Choice 850-1050 lbs. yield grade 2-4 34.00-35.50, some at latter price with end Prime but moderate amount of mud. Mixed Good and Choice 775-1000 lbs. 33.00-34.25, Good 29.00-33.00. Small lots Standard and Good 27.00-28.50.

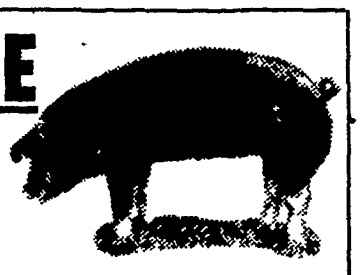
COWS: Utility and Commercial 17.00-19.50, few individual dairybreds 20.00.

BULLS: Yield grade 1-2 1400-2000 lbs. 20.00-23.00.



IMPORTANT NOTICE

LET US HANDLE YOUR FEEDER PIGS



NEXT FEEDER PIG SALE TUES., FEB. 18

Feeder pigs consigned to Walter M. Dunlap and Sons must arrive at the stockyards between 7 A.M. and 11 A.M. the day of the sale. Upon arrival they will be inspected by a veterinarian, tagged, and state graded.

The two sales scheduled for February will be held on Tuesday, the 4th, and Tuesday, the 18th, starting at 1 P.M. Consignors wishing to tag their pigs on the farm can get the tags at the state office at the stockyards, not later than 4 P.M. any day preceding the sale, thereby saving 25 cents per pig.

Consign all your feeder pigs to Walter M. Dunlap & Sons where they will be handled by a capable and experienced staff, and for further information call 717-397-5136.

Sutan® + and atrazine... my "go-fishin' herbicide"

Selective Herbicide

When I get my corn planted, I'm set for a little fishing. Before other farm jobs. With no cultivating or spraying a catch-up herbicide.

That's because I incorporate a tank mix combination of Sutan®+ herbicide and atrazine in the soil when I disc my corn ground for planting. Sutan+ takes care of the grass weeds. Atrazine gets the broadleaves.

Mixed in the soil, this combination works. Rain or shine. Sutan+ and atrazine are right in the soil destroying weeds as they sprout. No waiting for rain as with surface-applied herbicides. It's always dependable!

Sutan+ is designed to give excellent crop tolerance on a wide range of soil types under all variations of weather stress and application errors.

Sutan+ with atrazine has a top reputation for reliable broad-spectrum weed control in corn. No wonder I call it my "go-fishin' herbicide" combination.

Use it on your corn ground, too. Check dosage rates on the product container. Always follow label directions carefully. See your Stauffer supplier for Sutan+. Stauffer Chemical Company, Agricultural Chemical Division, Westport, Connecticut 06880.

Sutan®+ from Stauffer CHEMICALS

Pa. Auction Summary

19 Livestock Markets
Week Ending
January 31, 1975

Local Grain

Thursday, February 6

These prices are made up of the average prices quoted by a number of participating local feed and grain concerns. It should be noted, however, that not every dealer or broker handles each commodity. All prices are per busehl except ear corn which is per ton.

The average local grain prices quoted Thursday, February 6, 1975 are as follows:

	Bid+	Offered+
Ear Corn		
New	62.33	70.00
Old	—	—
Shelled Corn	3.01	3.23
Oats		
Local	1.67	1.93
Western	—	2.29
Barley	2.41	2.66
Wheat		
Feed	2.75	3.15
Millers	3.29	—

+Bid is the price the dealer will buy from the farmer delivered to the mill. Offered is the price the dealer will sell for at his mill.

Peoria Cattle

February 6

New York Dressed Meats

February 6, 1975

Daily distributive - less than carlot meat trade.

Compared with Wednesday: Prices unchanged for Beef, Veal, Calf and Lamb but weakness permeating general price structure for these classes. Pork Loins mostly $2.00 higher and other listed Pork cuts steady.

Poor movement of meats at both wholesale and retail influenced to some degree by snow and ice conditions in the entire area. Some in shipments running late particularly Beef and Lamb, also impeded by road conditions. Wholesalers continue in the struggle to hold money together but cutting of carcass Beef and Lamb into primal cuts definately a minus net dollar return.

Steer Beef

Prime 600-900 lbs. $61.50-63.00; Choice 600-700 61.00-63.00, 700-800 60.50-62.00, 800-900 59.00-60.50; Good 500-800 55.00-58.00.

Goodwill Industries Starts New Collection System

To combat the unsightly problem of overflowing Goodwill collection boxes, and help reduce rapidly rising costs of operation, Goodwill Industries of Lancaster County has initiated a new system of materials collection.

The system involves the use of 40 ft. trailers as collection vehicles, each manned by an attendant who receives donated merchandise in person.

Donated materials are all stored inside the trailer, eliminating rain damage, theft, and unsightliness. At the same time, the Goodwill attendant has the right to refuse any donations of unrepairable merchandise or trash, a problem that has plagued Goodwill for years.

Advantages to the donator are the ability to receive a tax-deductible receipt on the spot, and an assurance that the donated merchandise will not be ruined or stolen and the convenience of having attended collection centers placed in shopping districts during regular shopping hours.

Although the first of its kind in Southeastern Pennsylvania, Goodwill Attended Collection Centers have been tried in several larger cities throughout the nation, and all have proven extremely successful.

Two locations have been initially established in the Lancaster area. One is on the Lititz Pike on the Acme parking lot near the Lancaster Shopping Center. The second location is in the Manor Shopping Center. Operating hours will be from approximately 10:00 am to 9:00 pm Monday - Saturday. The centers will be closed on Sundays.

If the first two attended collection centers prove successful, Schell further states, additional manned trailers will be placed in other areas of Lancaster as well as some of the towns throughout the county.

Acquisition of the collection trailers was made possible through funds from the 2nd Annual Goodwill Radiothon in October of last year. Over $29,000 was raised from the 1974 Radiothon held at Park City.

Teens Sought For YCC Work

The Department of Education is recruiting youths between the ages of 15 and 19 to work in Youth Conservation Corps projects this summer, including some on State Park and State Forest lands.

YCC projects will last from four to eight weeks and will have room for approximately 382 enrollees, including 218 youths assigned to six residential camps and 164 commuting to projects at 21 non-residential sites.

The purposes of the program are to: accomplish needed conservation work on public lands; provide gainful employment for youth from all backgrounds; and develop an understanding and appreciation in the participants of the Nation's environment and heritage.

Enrollees will be chosen from among all completed applications by using a computerized random numbers table.

Application forms are available from secondary school guidance counselors.

Work assignments depend on the needs of the area but can include clearing stream banks, building trails, tending fish hatcheries, planting trees, constructing Park facilities and improving wildlife habitat.

Residential enrollees receive full means and lodging plus about $46 per week while non-residential participants will receive approximately $60 per week.

A program spokesman said that only those applicants selected for positions will receive notification from the State. The notices will be sent out by April 1.

Poster Contest

The students of the Junior and Senior High Schools are again invited to participate in the 26th Annual Gigantic Poster Contest being sponsored for the benefit of the orphans, underprivileged children and Shrine Activities Fund.

To be eligible to be a participant, you must reside in the following counties: Adams, Cumberland, Dauphin, Franklin, Juniata, Lancaster, Lebanon, Perry or York in the Grades 7 through 12.

Posters must be 14" x 20" prepared in a vertical [illegible]e the following: (1) Zembo Shrine Circus; (2) Farm Show Arena; (3) April 7 through 12.

The Industry's No. 1
Turkey Feeding System
Doesn't Need a
Traffic Cop

Big Dutchman's OVERHEAD CHAIN AND TROUGH FEED DELIVERY SYSTEM eliminates the TURKEY TRAFFIC PROBLEM. It allows the PRODUCER and the BIRD to move freely throughout the turkeyhouse, significantly reducing bumps and bruises to both.

The system also features:

- Proven, reliable chain and trough feed delivery.
- Durable, specially designed feed pans to reduce feed waste.
- Easily adjustable feed flow with optional individual feeder shut-off.
- Low Cost, Clear Plastic, Drop Tubes.
- Low maintenance requirement.
- Ample feeding space for every bird.

Soil Conservation Group Plans Annual Meeting

"Land Use: Food and Living" will be the theme of the 30th annual meeting of the Soil Conservation Society of America, August 10-13, 1975, in San Antonio, Texas.

General session speakers will consider the land use implications of meeting domestic and foreign food demands and what impacts expanded agricultural production will have on the nation's soil, water and other natural resources.

Specific challenges of using the nation's land resources to meet food and fiber needs will be examined more closely in a series of concurrent technical sessions arranged by the Society's 10 resource conservation divisions.

The Society will name its fellow and honorary members for 1975 during the meeting, along with the recipients of the $1,200 Donald A. Williams Soil Conservation Scholarship and twenty $500 Gildea Scholarships in Conservation.

Official hosts for the event are members of the Society's Texas Council of Chapters. Meeting activities will take place in the Hilton Palacia del Rio and San Antonio Convention Center.

Edward Thomas, state conservationist for the Soil Conservation Service in Texas, is program chairman for the meeting. C. A. Rechenthin, SCS state resource conservationist in Texas, is in charge of local arrangements.

the best helper any farmer can get

One of the friendly people at the Friendly First is Bob Badger — President of the Friendly First Farm Loan Corporation.

Bob's a native of the area — lives on State Street in Quarryville with his wife and two children — talks farm lingo and understands the problems that beset today's farmer. He's a Vice President of our Installment Loan Department and is a long-time expert at solving money needs for farm maintenance . . . new equipment and stock . . . plus all the other requirements that keep your farm a profitable operation.

Funds are now available for any and all agricultural needs. If you need help, come in and talk things over with Bob — the best helper any farmer can get! Give him a call at 687-8611.

Record Keeping Class Held

Farm Record Keeping was the topic of the Twin Valley Adult Farmer program recently at the Twin Valley High School. Speakers for the program were Mr. Glenn Beam, public accountant, and Mr. Richmond Young, Agway Farm Consultant. Twenty-six members attended.

Mr. Beam emphasized the important role that good bookkeeping plays in saving tax dollars. Beam used the Farm and Ranch Record book to illustrate the use of records for tax purposes. Having served local farmers for many years, he gave some helpful hints to make record keeping easier and more complete.

Mr. Young described the role that record keeping plays in analyzing and managing a farm business. Young used the Agway Farm Account system to illustrate how records are maintained and evaluated. His program, the Agway Farm Accounting and Tax Service, is relatively new to Pennsylvania and is rapidly expanding to meet the growing needs of farmers.

The next educaitonal meeting of the Twin Valley Young-Adult Farmers will be on Tuesday, Feb. 18. This shop program will feature demonstrations on "Winter Baler Maintenance" and "Tractor Servicing" by Eugene Stoltzfus from Dependable Motors of Morgantown.

Flue Damper

Don't close the fireplace flue damper until the coals are completely cool, cautions the Extension Safety Committee at The Pennsylvania State University. Even glowing coals continue to use oxygen. A fire on a cool evening is warming and soothing. And wood is a renewable natural resource, has a low ash content, burns cleanly, and leaves little waste.

Cheese is Nutritious

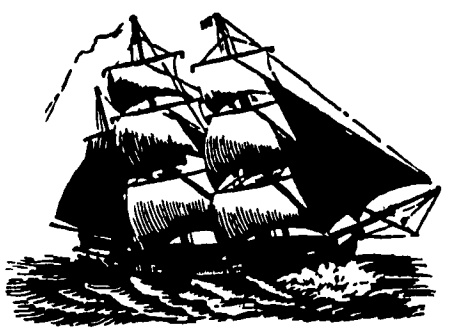
It takes five quarts of milk to make one pound of cheese. That's why cheese is such a good protein food, point out Extension consumer specialists at The Pennsylvania State University. In addition, cheese has the nutritious qualities of milk. That means you also get calcium, phosphorus, riboflavin, thiamin and vitamins A and D.

THE OLD FARMER'S ALMANAC

FEB. 10-16, 1975

Hoarse and sullen the night winds blow.

Misspend one quarter hour each day and at year's end you'll have wasted nine days of ten hours each . . . Could be worst weather of the year this week . . . New moon Feb. 11 . . . Geese are laying . . . Average length of days for the week 10 hours, 28 minutes . . . U.S. purchased Panama Canal strip Feb. 16, 1903 . . . We predict that this year, whatever old maids don't marry, never will . . . 66 degrees below zero at Yellowstone National Park, Feb. 10, 1933 . . . Shrimps or any raw fish for breakfast will help that bad "morning after."



Old Farmer's Riddle: What kind of ball moves, but is never thrown or caught? (Answer below.)

Ask the Old Farmer: What are your thoughts about the world's energy problems? Do you have any hope? G. K., Boston.

Our worldwide energy "crisis" is man-made and, hence, solvable. And we'd better reach a solution because our planet is the only place to live in the entire cosmos, an Elysian field compared with the surface of a star, not beset with the coldness of Jupiter, Saturn, Uranus, and Neptune, nor the waterless heat of Mercury.

Home Hints: To prevent nylon cord or twine from fraying at a cut end, heat the end over a small flame. Nylon will melt, and the strands will bond into a solid unit . . . *Riddle answer:* An eyeball.

OLD FARMER'S WEATHER FORECASTS

New England: Light snow changing to rain on coast and not so cold to start; clearing and colder latter part.

Greater New York-New Jersey: Rainy and warm at first, then rain mixed with snow or sleet; end of week partly sunny and colder with some light snow.

Middle Atlantic Coastal: Partly cloudy and mild to start, then scattered showers and colder; showers in south and light snow in north latter part.

Southeast Coastal-Piedmont: Week begins cold and raw, then some rain; week ends partly cloudy and cool in north and light rain in central and south.

Florida: Fair and warm day and cold nights to start, then cloudy and cold; rain throughout region by weekend.

Upstate & Western N.Y.-Toronto & Montreal: Most of week rain occasionally mixed with snow in south; 2-4" snow in north to start and heavy snow in west latter part.

Greater Ohio Valley: Cloudy at first, then light snow in west and snow showers in east; cold snap and some light snow latter part.

Deep South: Most of week fair and warm except light rain and cool in north.

Chicago & Southern Great Lakes: Week begins cloudy, then light rain in west and flurries in east; end of week clearing in west with light snow in east.

Northern Great Plains-Great Lakes: Early week clear and warm in west, mild in central and east; end of week unseasonably warm.

Central Great Plains: Cloudy at first, then heavy rain in south and hail in some areas; generally clear and dry latter part.

Texas-Oklahoma: Showers to start in central and south, then clearing and very warm; end of week cold and partly cloudy.

Rocky Mountain Region: Early week cloudy and seasonable in north and central, clear and mild elsewhere; week ends mostly clear and mild.

Southwest Desert: Most of week clear and very warm in west; cool to midweek in east, then warmer.

Pacific Northwest: Mostly sunny and cool all week in south; end of week unseasonably warm in north.

California: Cloudy, cool all week; light rain in north latter part.

Farm Commentary

by Dick Wanner

Rail Situation Becoming Bleaker

"There are going to be widespread rail abandonments in the Northeast. I feel it in my bones," we were told this week by Donald Parke, executive vice-president of PennAg Industries, an organization composed mostly of Pennsylvania feed and fertilizer dealers, and headquartered in Ephrata. On Tuesday of this week, Parke was a participant in a rail study conference organized by Adams County Agent Thomas Piper. Piper organized the meeting to probe the potential problems of rail abandonment in and around Adams County.

At the meeting, Parke talked about the problem of abandonments from the viewpoint of the shipper. "The railroads are talking about shutting down miles and miles of branch lines," Parke said. "These are the very lines that are most important to the farmers and the feed dealers in Pennsylvania. These are the lines that bring in the bulk feed ingredients and the fertilizers. Take these lines away, and you increase the costs to the dealers and to the farmers. There's no way that trucks can compete with the cost of hauling materials like bulk soy by train."

One impact of a loss of rail service could be that some mills will no longer be able to afford the ingredients for custom mixing. "Some mills do mix up special formulations using the grain from their farmer customers. That kind of service just won't be available, though, if the mills can't buy the bulk soy to go with the grains."

Parke said he has proposed a complete turnaround in the approach to the nation's rail problems. And it includes keeping a lot of the branch lines open. "It's just not necessary to shut down branch lines," he commented. "We're going to have economic turmoil for years along abandoned lines. It's not worth it, because the branch lines contribute very little to the deficits which the railroads are running up."

"But I must admit, I'm not very hopeful. I think we're going to see abandonments."

The Accusing Finger

Our telephone interview with Gerald Charles, publicity chairman for the Perry County NFO affiliate, started off a bit chilly on Friday morning, but seemed to warm up a bit toward the end.

"If you're going to call us militants, I don't want to talk to you," Charles said. "If you're not going to call us militants, then I'll talk."

Charles, a dairyman from Liverpool, had taken umbrage at a remark by this writer in a recent issue of Lancaster Farming which alluded to calves being slaughtered by "militant NFO members in the Midwest." We had made reference in that story to a photo which appeared some weeks ago in national media, showing a farmer, cigar clenched between his teeth, a pistol in his hand, blowing the brains out of a Holstein calf. The photo caption said the gun-weilder was an NFO member.

"That was not an NFO member," Charles said. "Our president, Oren Lee Staley, did not authorize those actions, he does not approve of them, and neither do we NFO members here in Perry and Dauphin Counties approve of shooting calves. We just want to make a better living, and we think we can do that with the help of the NFO, which is strictly a bargaining agent for farm products."

It is not the purpose of this newspaper or this writer to speak either for or against any farm organization. Lancaster Farming's bias is for the farmer and for the land. We support those people and organizations who work for farmers and farming. We applaud efforts to bring the farmer's story before the general public.

But we cannot condone acts of violence aimed at shocking the public into awareness of farm problems. Shooting calves in a field, over an open trench, is a violent act. It debases agriculture. Our recent comments on that action were sincere.

At the same time, we would not want to damage any group which did not actively participate in those acts of violence. Certainly, the local NFO members have never to our knowledge engaged in militant actions like those that have characterized some Midwestern farm groups. Nor would we want to wrongfully blame the national NFO organization for acts it did not condone.

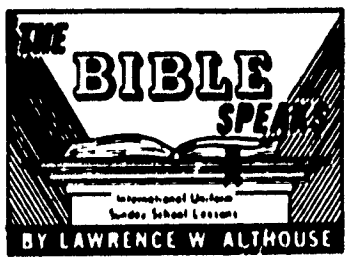
Of Golf Courses and Hunger

"Cruel and misleading" is how Ed Wheeler, president of The Fertilizer Institute, labels suggestions that non-farm use of fertilizer in the U.S diverts substantial supplies from agriculture of underdeveloped countries Wheeler says such suggestions have raised expectations far beyond abilities to provide financing or delivery to emerging nations.

Robert Steiner, a fertilizer coordinator for the UN Food and Agriculture Organizations, says it is unrealistic to talk about fertilizer being taken from golf courses in America to supply farmers in developing nations. "What are needed are funds from wealthier countries to secure fertilizer deliveries and to help pay shipping charges"

"Quite simply, the emerging nations are broke," notes Wheeler. "Their treasuries are bare, caused primarily by the unreasonable prices they are forced to pay for oil. High oil prices in turn have greatly contributed to high fertilizer prices."

About 3.5 per cent of U.S. fertilizer consumption goes into non-farm use Besides lawn and golf courses these uses include vegetable gardens, public park and playground maintenance, highway shoulder construction and airport runway de-icing.



ON BEING "CHOSEN"

Lesson for February 9, 1975

Background Scripture: 2 Corinthians 8; Ephesians 4:11-16; Titus 3:8-14; James 2:14-17; 1 Peter 2:9.

Devotional Reading: Isaiah 1:10-17.

"Congratulations, you have been chosen. . . .!"

Those are exciting words, for everyone wants to be chosen, to win recognition, to be singled out for some honor or privilege. We like the honor and we also covet the privileges that come to thosen who are "chosen." If someone regards us as "special," we usually receive "special" treatment too.

This is the way the people of Israel sometimes felt about being God's chosen people." Singled-out by God as "special," they gloried in their status and their expectations of the advantages that status would bring them.

"A Chosen Race"

To a degree, they were correct: God has chosen them and set them apart as something "special." Of all the peoples of the world they were set apart. But what the people of Israel overlooked was the purpose behind this "special" status. God had chosen them, not to give them status, but a task! The whole purpose of his selection was that he had something for them to do.

To be sure, being "chosen" by God was still an honor. But much more than the honor was the responsibility it carried with it. The man who wins an election is, in a sense, "honored" by the electorate, but after the victory celebration has died away, the person who has been "chosen" is expected to render public service. In a like manner, winning a place on the basketball team is an honor, but it is also a great responsibility and much is expected of the person who has been "chosen."

This is what the writer of I Peter is saying to the New Testament churches: ". . . you are a chosen race . . . that you may declare the wonderful deeds of him who called you out of darkness in to his marvelous light." (I Peter 2:9).

They were "chosen" because God had a job for them to do. Being "chosen" means being a service to render for God. With the honor there went a responsibility and they could not be God's "chosen people" unless they were equally willing to work for him. As the old spiritual puts it: " . . . If you can't bear the cross, Then you can't wear the crown."

True Excellence

In writing his second letter to Corinth, Paul reminded the Corinthians that as God's "special" people, they were therefore responsible for responding to the needs of their fellow-Christians in Jerusalem. They had a good reputation for their faith, their knowledge, and their love, but Paul was calling upon them to match this status with generosity towards those in need: " . . . as you excel in everything - in faith, in utterance, in knowledge, in all earnestness, and in your love for us - see that you excel in this gracious work also." (2 Cor. 8:7).

Paul knew that if people really had the faith they claimed to have, they would also have a compassionate heart towards others. James also stressed this idea: "What does it profit, my brethren, if a man says he has faith but has not works?"

Let the "chosen" people of God rejoice in their election by the Lord. But let them also just as enthusiastically accept the task he puts in their hands.

NOW IS THE TIME. . .

Max Smith
County Agr. Agent
Telephone 394-6851

To Borrow With Caution

Credit is a very important item in most farm operations, but there is a limit as to the amount that should be borrowed; this will vary from farm to farm and in many cases, is based upon the management ability of the farmer. Caution is needed because production costs are expected to rise while farm income may not. There will be some farmers who will find themselves greatly over extended, if the increase in most costs continue to exceed advances in farm product prices. Considerable planning on repayment ability in line with adequate cash flow will be necessary, if farmers are to remain in a solid financial position.

To Beware Of Johnsongrass

This agressive weed needs far more attention than some farmers are willing to give, according to a recent speaker at a forage meeting. It is growing in many parts of Lancaster County and many neighboring areas. It is a tall-growing grass, resembling the appearance of sudan grass or sorghum, and is very difficult to control. Several years ago, some concerns were selling a sorghum grass that was too closely related to Johnsongrass. Farmers who now have patches of Johnsongrass should be making some plans to eradicate the weed in the next few years. If left uncontrolled, it will take over the field and no other crop can survive.

To Transfer Silage

Dairy and livestock producers who have silage stored in trench or bunker silos, and who plan to transfer the material into an upright silo for automotive feeding, should be making plans to do this work before warm weather arrives. Silage transferred when temperatures are below or near freezing, will have less heating and will be in better condition than if done when temperatures are above 50 degrees. The job should be done as quickly as possible, and there is not any need of applying water or other materials. If any form of synthetic protein (urea or anhyrous ammonia) was not added last fall, it should not be added when the silage is transferred. This same thing is true about ground limestone for cattle feeding. These materials should have been added when the forage was ensiled, and not at the time of the transfer into an upright silo.

To Control Run-off Water

The spring months usually bring rain and in some years extra water because of melting snow. In the case of feedlots and barnyards, it is important that this run-off water be directed to sod-covered land, or to a catch basin. Diversion ditches may have to be made to prevent this water from running into a public stream or out upon a public highway. One way to prevent being reported to the Department of Environmental Resources, is to stop water pollution before it occurs. Planning for proper run-off and waste disposal is very much in order.

Farm Calendar

Tuesday, February 11

Dairy Meeting 4 for the Ephrata Adult Farmer's program at the Ephrata Area High School at 7:45 p.m.

Annual Dinner meeting of the Lancaster County Agriculture Extension Association at 6:30 p.m.

Wednesday, February 12

Direct Marketing for Jug Milk dealers at the Farm and Home Center 1:00 - 3:00 p.m.

Public NFO meeting at the Band Room Halifax Area High School 8:00 p.m. - Dauphin Co.

Dairy Day in Montgomery Co., Collegeville Inn - 10:00 a.m.

Thursday, February 13

Tuesday, February 18

Ephrata Adult Farmer's monthly meeting at the Ephrata Area High School ag classroom 7:45 p.m.

Manheim Young Farmer's hog management meeting at the Manheim School.

Crops Day at Lancaster Farm & Home Center 9:00 a.m. - 3 p.m.

Ephrata Young Farmers Elect Officers at Meet

The Ephrata Area Young Farmers, their wives and guests jammed the Mt. Airy Fire Hall banquet room last Saturday night for their annual dinner meeting. The featured speaker for the evening was June Alexandar, Pennsylvania's deputy secretary of agriculture.

Mrs. Alexander told the state's largest Young Farmer association that the family farm was here to stay and growing every day. She said that one of the aims of the Pennsylvania Department of Agriculture was to foster the idea of family farms. She also said that the department was in back of some recently enacted legislation which gives more money to local community fairs.

Others to address the group were Barry Wissler, president of the Cloister Chapter FFA, Paul King, Cochranville, regional vice-president of the Pennsylvania Young Farmers Association, and James C. Fink, Harrisburg, supervisor of the Pennsylvania agricultural education program.

During the meeting, the officers for the coming year were installed. They are: Earl Stauffer, Ephrata RD2, president; Marvin Weaver, Ephrata RD1, vice-president; Ray A. Kline, Reinholds RD1, treasurer; Daniel Fox, Ephrata RD1, secretary; Earl Smoker, Ephrata RD1, public relations director.

Milking awards for outstanding production over the past year went to Marvin Weaver and Earl Smoker. The outstanding young farmer award was presented to retiring president Earl G. Martin, Ephrata RD2. Community service awards went to John R. Zimmerman, Ephrata RD1, and Mr. and Mrs. Paul Bucher, Lititz RD4.

Mr. and Mrs. Earl Stauffer won the award for the most active Young Farmers. Appreciation awards were presented to Larry Loose, a partner in the Green Dragon Farmers Market and Auction, Ephrata, and Dick Wanner, editor of Lancaster Farming.

Paul King, left, regional vice-president of the Pennsylvania Young Farmers Association, chats with Ephrata Young Farmer Officers elected last Saturday night during that group's annual banquet meeting at the Mt. Airy Fire Hall. The new officers are, seated, Daniel Fox, secretary, and Earl Stauffer, president. Standing, center, are Ray Kline, treasurer, and Earl Smoker, public relations director.

Barn spraying our business, not a sideline.

YOU REAP WHAT YOU SOW, EVEN DURING A FERTILIZER SHORTAGE.

You count on a lot of things to give you a good return. From expensive farm equipment to the right amount of sunshine. But this year more than any other, your fertilizer investment is going to make the difference.

Right now we're all struggling against the fertilizer shortage. So the quality you use becomes even more important than the quantity. And Royster is doing something to help you get the best.

There's still no way we can promise you'll get all the fertilizer you want. But this year, we're manufacturing more Bonanza Crop Specials. It's our finest fertilizer. And it's your insurance that you'll get the greatest return on every dollar invested.

Bonanza Crop Specials are supercharged with specific micronutrients. Because some crops use higher amounts of one or more micronutrients than others. And sometimes an area is deficient in certain micronutrients. That's why we make Specials for every major crop in every market we serve. And that's 13 crops in 20 states.

Our Bonanza Crop Specials are such a valuable investment we even wrote a booklet about them. To get yours, write Marketing Services, P.O. Drawer 1940, Norfolk, Virginia 23501.

Or better still, visit your friend in the fertilizer business. Your Royster dealer. He'll help you make a good fertilizer investment. Because he knows when you put good things into your land, you expect good things back.

"Sold!" . . . For $1.3 Million

Buyers came from all over again this year, and they spent some $1.3 million for farm equipment of every description at Wenger's Farm Machinery, Inc.'s, annual sale held Tuesday and Wednesday. Carl Wenger, a partner in the firm, said the first day's sales this year were just about the same as the two-day figure for 1974, when the gross was just under $1 million.

"The market wasn't quite as high this year," Wenger said, "but we had more equipment to sell. This year we sold 171 tractors. Last year it was 144 The smaller tractors really took hold this year. And a lot more of the buyers were local, in a five or six state area. We had excellent support from local dealers and farmers."

There were again some dealers from the Midwest and the Southwest, Wenger noted, but not nearly as many as there were last year when the used equipment market was about as tight as it's ever been In addition to the big interest in small tractors, Wenger said combines and other farm machinery sold very well, and this year's industrial equipment volume was double the '74 mark.

The high price paid this year was $27,000 for a brand new John Deere 4630

In all, some 1100 people registered to buy over the two-day auction, and Wenger figures that there were easily 5000 people there buying and looking.

Auctioneers Jack Snell, left, from Mexico, Mo., and Bob McWhirter, Jr., Baxter, Iowa, were kept busy on Tuesday as they faced a packed audience of tractor buyers.

Acres and acres of farm equipment, some $1.3 million worth, was set out before prospective buyers' eyes this Tuesday and Wednesday at Wenger's Farm Machinery winter sale.

Poultry Disease Handbook

Diseases - the cause of most concern in the poultry business - may originate in a flock by three different means, according to a "Poultry Health Handbook" published by The Pennsylvania State University's College of Agriculture.

"Diseases are brought on the farm with new poultry, contamination as a result of carry - over from previous flocks, and are introduced by a lack of sanitation or relaxation of security measures," said Dr. L. Dwight Schwartz, Penn State Extension veterinarian and author of the publication.

The handbook is designed to provide poultrymen, servicemen, fieldmen, and hatcherymen with a ready and accessible source of information about poultry diseases and other aspects of poultry health.

"The introductory section includes such topics as a sanitation outline, a list of reliable disinfectants, a description of the Pennsylvania Vaccination Program, and other facts useful for creating and maintaining sound poultry health programs," Dr. Schwartz points out.

Another section covers the respiratory diseases of poultry regardless of the causative agent - virus, bacteria, protozoa, or parasites. Still another section is devoted to miscellaneous poultry diseases.

The book may be purchased for $2.50 plus 6 percent Pennsylvania sales tax. Make check or money order payable to The Pennsylvania State University and send with your name and address to POULTRY HEALTH HANDBOOK, Box 6000, University Park, Pa. 16802.

Solanco Dairy Club

The Solanco Dairy Club held its first meeting recently with Tom Galbreath, president, presiding. Officers elected at the meeting included: Joe Winters, president; Marshal Trimble, vice-president and Donna Akers, secretary-reporter.

Dr. William Fredd addressed the club on the purpose of meeting, stating that learning to appreciate dairy animals as well as developing skills in judging and showing were some of the main ideals of the organization.

The club decided that the meeting would be held on Wednesday evenings at 7:30 p.m.

Lancaster County's Crops & Soils Day Slated for Feb. 18

The 15th annual Lancaster County Crops and Soils Day program has been scheduled for Tuesday; February 18, at the Lancaster Farm and Home Center, associate Lancaster County agent Arnold Lueck announced this week.

The doors to the Farm and Home Center auditorium will open on the exhibits and displays at 8:30 a.m. The program will begin an hour later when Lueck will present a film on water movement in soils, and give some of his observations on crop production.

Other morning speakers will be Dr. W. Wayne Hinish, Penn State extension agronomist, who will talk about adjusting soil test recommendations, efficient fertilizer use and new soil tests in the works. John Yocum, superintendent of the Penn State Southeast Field Research Lab at Landisville, will give an update on alfalfa, soybeans and tobacco.

Henry F. Nixon, director of the Pennsylvania Department of Agriculture's Bureau of Plant Industry, will round out the morning with a presentation on licensing procedures for pesticide applicators.

Lunch will be available at the Farm and Home Center for $2.

Dr. Willis L. McClellan, and Dr. Joe H. McGahen, extension agronomists from Penn State will give the afternoon program, which is set for adjournment at 3:00. McClellan will talk about weed control in major farm crops and the outlook for herbicides. McGahen will talk about obtaining maximum returns from the '75 corn crop.

ED ESHLEMAN'S WASHINGTON REPORT

One of the alternative energy conservation ideas being circulated in Washington involves rationing. There is a lot of talk that rationing would be better than higher gas and oil prices. Another point stressed is that rationing would be more equitable than higher prices that tend to favor the rich.

But before you get sold on rationing, take a close look. First, consider the fact that those talking about it loudest are providing you with no details. Would everyone be allocated five gallons, or ten gallons or fifteen gallons a week? We do not know because no one wants to get that specific.

Rather they prefer to talk about giving the President stand-by rationing authority, or, in other words, put the monkey of coming up with details on his back. That way, these politicans will say that they have dealt with the energy problem by instituting a rationing policy, but will take no responsibility for the hardships that the precise regulations connected with the program might cause.

If these lawmakers want rationing, let them come up with a specific program, not a stand-by program. Let them spell out the details of what they are proposing so that everyone has a chance to evaluate their plan before they consider it as a reasonable alternative.

Why aren't details being spelled out? The answer is because the specifics make rationing far less attractive. What if the upward limit per consumer turned out to be as low as five gallons per week? How many families could get by on that?

Also, there is considerable question whether it is all that equitable. There is a built-in assumption that some people are going to get more gas than others - those who use their car to make their living, those who need their car to obtain medical care, the farmer to run his machinery and many others who for good reason would qualify for an extra ration.

Another major consideration must be the possibility of black-marketeering. The black market was very much a factor in the gas rationing efforts during World War II and can be expected because black market fuel would be most available to those most able to pay for it and the result would be dwindling supplies of fuel for those citizens who stayed legitimate.

Finally, there is the question of price. Rationing does not guarantee a stable price. Therefore, you have to assume that any such program must also involve price controls. Such controls and rationing combine to establish the need for a huge new government bureaucracy to police the programs locally and administer them in Washington. That raises another question - who pays for this expansion of government? Obviously, the same taxpayer.

Critics may be right that the President's plan to conserve fuel with higher prices is not the right one, but the case for rationing as a better plan has not yet been made.

Holsteins Receive Honors

Holstein - Friesian Association of America has announced lifetime milk production credits of over 100 tons for three Pennsylvania Registered Holsteins. They join a select group of over 700 cows of the breed to be recognized as "iron grandmas" by the Holstein Association. During their individual careers in food production, they each produced nearly 100,000 quarts of milk!

Ann Star Osborndale 5201760 (EX-3E), whose lifetime output stands at 204,030 lbs. of milk and 6,754 lbs. of butterfat, is owned by Conewago Farms, Elizabethtown; Gautland Ivanhoe Loretta 5622393 (GP), whose lifetime output stands at 205,929 lbs. of milk and 8,166 lbs. of butterfat, is owned by John W. Gaut, Scottdale; and Roaring Maples Pilot Bess 5639560, who was owned by Roy H. & Ruth H. Book, Ronks, had a lifetime production of 202,270 lbs. of milk and 7,019 lbs. of butterfat.

Milk and butterfat records of more than 115,000 Registered Holstein cows on official test were added to the Holstein Association's files last year. Production testing is a herd improvement program which aids dairymen in maintaining a more profitable operation.

Honey Production Reported in Maryland

Maryland bees, busy producers of that delicious and flavorsome sweetner, honey and of beeswax, were fewer in number and less productive in 1974 than during the previous year.

The Maryland Delaware Crop Reporting Service, the cooperative statistic gathering center of the USDA and the Maryland Department of Agriculture, says that the state's 12,000 bee colonies produced 264,000 pounds of honey and 6,000 pounds of wax in 1974. The 1973 yield was 442,000 and 8,000 pounds respectively.

There were 1,000 fewer bee colonies active than in 1973, when colonies numbered 13,000. Last year's 12,000 colonies yielded 22 pounds each, some 12 pounds less than in 1973, a substantial production fall off, mostly attributable to weather factors.

John Lindner, beekeeping inspector for the Maryland Department of Agriculture, who operates out of Cumberland, says that the decline in honey production last year was primarily the result of unfavorable weather in spring and fall, which came just at the time of the honey flow. He also pointed out that these climatic conditions adversely affected bee swarming to reduce the number of colonies.

By Maryland law, beekeepers and apiaries are required to be registered with the Maryland Department of Agriculture, Apiary Inspection Office, Pest Management Section, College Park, Maryland 20742. Last year there were 582 beekeepers and 750 apiaries so registered. Mr. Lindner inspected more than 6,000 colonies and rendered valuable assistance to hundreds of beekeepers.

A major purpose of the registration law is to control and eliminate bee dieases, which reduce honey production. Only three apiaries had to be quarantined in 1974. Most of the state's apiaries are located in Western Maryland, where apple and peach orchards abound. The pollination function of bees is essential to the production of these and other fruits.

Maryland's 1974 honey is bringing an average of 67.1 cents per pound, as contrasted with 58.9 cents in 1973. The 1974 yield is valued at $177,000 and the wax at $7,000. At mid-December, Maryland producers had 32,000 pounds of honey on hand.

U.S. production of honey reached 185,338 million pounds in 1974, down from 236,657 million the previous year. The average bee colony produced 44.2 pounds, while in the 20 major beekeeping states, the yield per colony was 60.2 pounds. Thus, Maryland production ran about 50 percent less than the U.S. average.

How Not To Beet

(Continued from Page 1)

economics. Besides, the closest processing plants right now are in western Ohio and Michigan. It would cost a lot to ship beets that far."

Eakin is not even keen on people growing sugar beets in their gardens. "Beets are only about 15-percent sugar," he said. "Raw beets don't even have a sweet taste, and they're not fit for human consumption. The extraction process is very complicated, that's why it takes an expensive processing plant. I've heard from some people who want to know if they can make beet sugar the same way they make maple sugar, but there's no remote similarity between the two processes.

"All you have to do with maple syrup is boil it long enough. Beets need grinding, crushing, heat, pressure, chemicals - it's very complicated. You just can't make your own sugar from back yard beets."

Eakin's pessimistic comments were echoed in a letter from Gerald Coe, a research geneticist with the USDA's field crops laboratory in Beltsville, Md.

One-by-one, Coe ticked off the points against sugar beets, with a single tick in their favor. He, too, pictured an outlook that is heavily against beet production here. Coe said:

1. It takes a $40,000,000 factory to extract the sugar from sugarbeets.

2. It takes about 3 years to build one of these factories.

3. Until 1974, the return on the capital investment in a sugar-beet factory was extremely small. I would guess less than 5 percent in most years, and in some years no profit at all. For this reason, the only factories built in the U.S. in recent years have been in North Dakota by Farmer's Co-ops, where the profit is in growing large sugarbeet acreages and not in factory operation. Knowledgeable people realize that by the time a sugarbeet factory is built the price of sugar may be back down to 11- or 12-cents a pound. Therefore, it is nearly impossible to attract outside capital into a sugarbeet factory.

4. A sugarbeet factory operates about 90 to 120 days a year. This is the maximum length of time beets can be stored after harvesting. Deterioration in root storage piles makes it unfeasible to process for a longer period. Sugarbeet factories contract acreage to growers in order to assure an adequate supply and to prevent an oversupply. Therefore, the sugarbeets are grown rather close to the factory. Hauling costs make it uneconomical to grow beets very far from the factory.

5. Permanent factory employees spend most of the year repairing factory equipment getting ready for the next campaign (harvest season). Trained personnel to operate and repair a factory are scarce, and they do not like moving to a factory in a new area because the chances of the operation being a success are rather small.

6. Several years of experimental trials in a new area are essential to be sure sugarbeets can be grown successfully.

7. Even when sugarbeets can be grown successfully, a thorough economic feasibility study is essential to be certain farmers will grow sugarbeets year after year. Farmer ownership of the factory is one means of insuring a supply of beets, but even this will not work if competing crops are too attractive.

Unlike corn or wheat, an unusually large number of factors have to be ideal before the growing of sugarbeets is practical even in areas where sugarbeets can be grown. We have had many inquiries from people who, under present market conditions, think they would like to get into the sugarbeet business. I can only recommend that they proceed with extreme caution, get all the facts, call in experts from sugarbeet growing areas, and then get into the business when there seems to be no other alternative. Actually, this is a pessimistic point of view, but not too far from a realistic outlook."

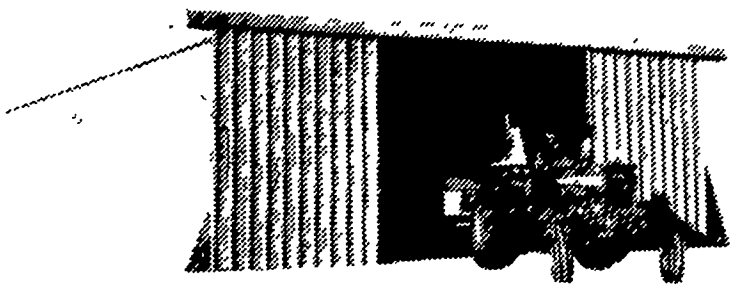
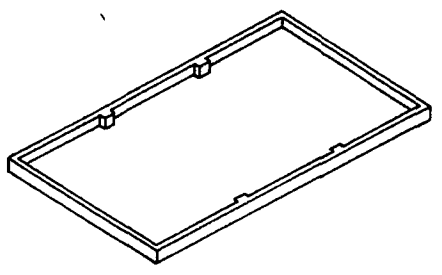
FREE CONCRETE



When You Buy Any Butler Farmsted® Building . . . For a Limited Time Only!



CURTAIN WALL

It's all yours. Free. Enough concrete for an 8" wide curtain wall foundation when you buy a Butler Farmsted® building. The amount of concrete furnished is limited to the amount specified in the Butler foundation drawings @ $26.75 per yard maximum. If you elect to pour a complete concrete floor, you'll be credited the amount of concrete required for the curtain wall foundation.

All-Metal Farmsted is fire-resistant and termite-proof. Clear-span interior. No space-stealing rafters or trusses. Easily insulated. Complete accessories available. Offered in a variety of sizes. Adaptable to almost any farm or ranch use.

Don't miss out on the free concrete. Offer expires midnight March 31, 1975.

BUTLER KAN-SUN BATCH DRYER

The Kan-Sun Batch Dryer is especially designed for

- the farmer whose daily harvest rate is under 2 100 bushels
- the farmer who is drying grain for the first time and wants to make a minimum dryer investment
- the feeder who raises limited amounts of grain and doesn't want to haul his grain to town for drying and haul it back for feed
- . the farmer with separate field and storage locations, the portable Kan-Sun Batch Dryer can be moved to the grain, and to the storage
- the farmer who owns an in-bin system such as Butler Stor-N-Dry® and wants to increase his daily drying rate he will use the Kan Sun for drying and the bins as cooling and storage tanks (*dryeration*)

The Butler Kan Sun Batch Dryer can remove 10 points of moisture from 90 bushels of corn an hour In a 24 hour drying day the total dried and cooled will be 2,100 bushels Using dryeration can increase drying capacity to 2 700 bushels

BUTLER®

AGRI-BUILDER

50,000 Chickens

(Continued from Page 1)

hair and sometimes even on the ground near the chickens. Nor do the ladies with chickens keep their egg money, like my grandmother did, in cracked Mason jars.

Today, the ladies with the chickens keep their money in the bank, and they have white chickens. And they don't keep a small flock. They might, in fact, keep as many as 50,000 layers, like Norma Frey.

Norma does tend 50,000 layers, and she does it single-handedly except for Craig Frey, her husband's cousin and hired hand, who helps her every day with the packing chore.

Norma manages the triple-deck caged layer operation for her brother, Donald, owner of Hershey Equipment Co., in New Holland. "This used to be a floor house," Norma recalled when Lancaster Farming paid her a visit one recent morning. "Then we only had 12,000 layers. When we switched over, a few months ago, we brought in four times as many birds, but the work really takes just about the same amount of time. And it's a lot easier." As she spoke, Norma was working at a table full of eggs, most of which went all the way from the chicken to the refrigerated cooler without once being touched by human hands.

Every morning from 8:30 to 10:30, Norma's at the packer, watching the eggs go through at the rate of 50 cases per hour. In the afternoon, she's there from 2:30 to 3:30 again, picking out the cracks, watching for trouble, keeping the machine flowing smoothly. Under her watchful eye, the mechanical marvel packs up to 40,000 eggs a day.

Conveyed gently from the cages by a moving belt that runs the length of the building, the eggs go onto a moving ladder to be lifted one flight up onto the belt of the packer. There, they're fed automatically onto rollers, grasped gently by metal fingers and placed into flats. The flats leave the packer, go onto another belt, where they're stacked, by hand, by Craig. The flats are placed onto wheeled dollies and moved into a cooled storage room for pickup the next morning by a driver from Victor F. Weaver, Inc.

Norma Frey keeps a watchful eye on the mechanical packer that enables her to just about single-handedly care for 50,000 layers. The laying house is a highly-automated unit built and owned by her brother Donald Hershey, owner of Hershey Equipment Co., New Holland.

Before she got into the egg business, Norma was a secretary for an orthopedic surgeon, and wore a white uniform to work every day for eight years. Then, three years ago, she went to work for her brother. "I grew up on a farm, and my husband, Dave, is a farmer, and I just like this work better than being in an office all day," Norma said. "I'm here about seven every day. I walk through the cages to see if anything's wrong. I check the water meters to see how much the birds are drinking, and get set up for packing. I like the schedule and being on my own. My brother buys the feed and the birds, and he pays the bills, but I'm responsible for the day-to-day operations."

The Hershey layer operation isn't a one-of-a-

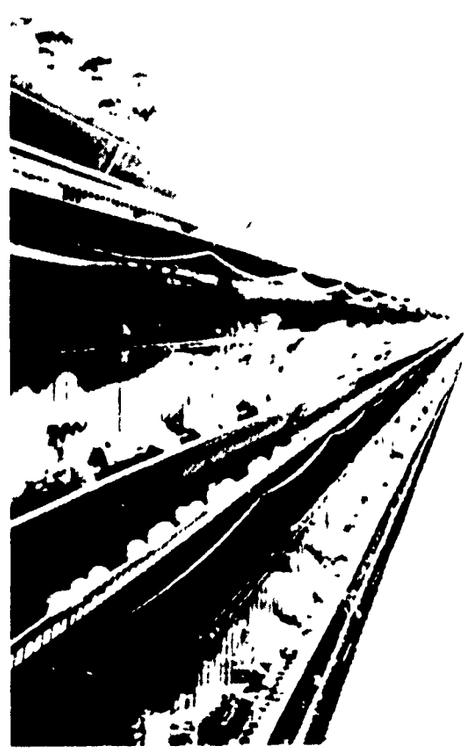
't a one-of-a-

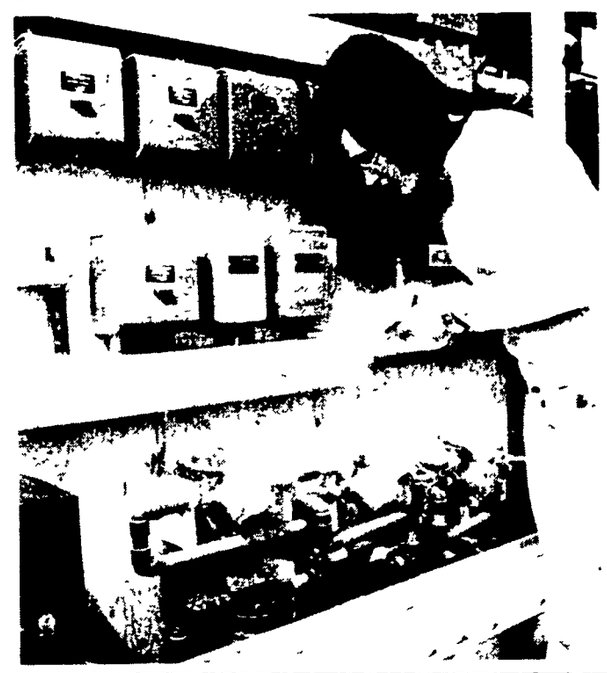
kind building, but it is new enough and interesting enough so that it drew several hundred people to an open house held the other week. At the open house, Hershey explained some of the systems that went into building. "The whole thing cost about $3.25 for each bird," he said. "We've got the birds nine to a cage. Negative pressure ventilation keeps the climate always the same. We have alarm systems rigged up to let us know if the current goes off or if the heat goes haywire, or if the water pressure drops. The alarms go off in the chicken house, and they're also hooked up to a neighbor's telephone."

The cages are stacked three-high, and just as the eggs are conveyed automatically to the packer, manure is conveyed to a 40-foot-long pit that underlies one end of the house. "We have storage capacity in the pit for a four-month supply," Hershey said. "When we're ready to empty it out, we sell the manure to a neighboring farmer for fertilizer."

Norma and David Frey live on a Millersville RD1 farm adjoining the Hershey operation.

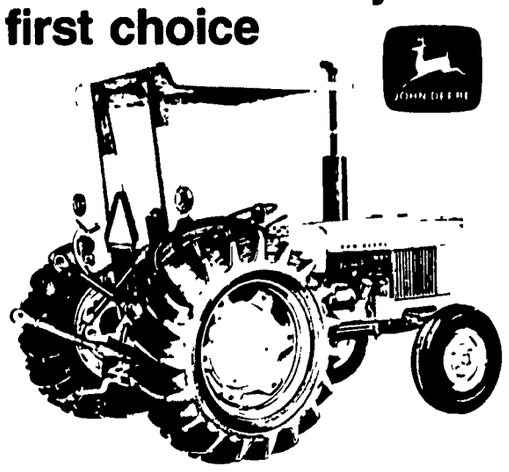


Stretching almost to a vanishing point, Norma Frey's 50,000 charges produce as many as 40,000 eggs a day. And Norma runs the operation all by herself.



Checking the water meters is one way Norma Frey keeps tabs on the 50,000 chickens in her care. If problems show up here, Norma sees that they're taken care of.

The 45-hp 1530 Diesel...Whether you're looking for a 1st, 2nd, or 3rd tractor, the 1530 should be your first choice



If you can do all your farming with a 40- to 50-hp tractor, you'll really like the 1530 with its high-torque, variable-speed diesel engine that'll put a lot of snap in all your equipment. Or if you're looking for a loader tractor, you'll appreciate the 1530's 8-speed transmission with built-in shuttle shift. And its power steering and hydraulic brakes. Stop in soon and get the details on this field-ready tractor that'll slip into any farming operation . . . and budget.

Area Youth Serves

(Continued from Page 1)

to their villages with equipment and initial medicine supplies to begin their work."

The girls charge no fee for medical attention but sell the required drugs in order to make money to reinforce their own supplies."

The village must supply the house or building for the medical technician although most of her supplies are given by the Church organization.

As a volunteer, Linda did not have any formal orientation and did not speak the native Spanish language when she first began her duties.

"It took me about a year to learn Spanish well enough to communicate with the people."

Linda explained that the clinic has been very well accepted since its inception in the early 70's.

"Many of the people in the surrounding areas use our services and some walk 3-4 hrs. from the outlying districts also."

Although many of the villages send girls to be trained some of the more backward people under the influence of "quack doctors" will not come to the clinics or send their girls to be educated.

"In those types of villages we do not force our services on them since the doctors have too much rigid influence."

Often, the medical team from the clinic visits the village centers to check on the work of the technicians. It was on one of these trips that Linda had an experience she will never forget.

"We were going to a village that was out in the mountains, we flew by a small plane to one village and from there we were to be taken by mules on a 4 hour ride to the village we wanted to inspect."

"We were late getting started through the mountains and we were forced to ride the mules on mountain roads during the dark. I was very frightened and was very happy to reach the village that night."

"It rained and was cloudy for the next day and our plane could not land at the first village to pick us up - we had to wait until the next day which made us somewhat apprehensive."

When asked how the conditions differed in Central American country Linda commented in this manner.

"The large cities are much like our US cities with large modern buildings and most of the comforts."

"The rich people live in ranch style type houses while the poorer people live in adobe houses with tile roofs."

Linda explained that most of the larger cities have movies and sports and even the smaller villages have stores from which to select items.

"American style food can be purchased in the large cities Linda explained "but in the small villages the people usually eat beans, corn, rice and tortillas." Very little meat is eaten she explained and then it is only about once every one or two months.

The main subsistence for the villagers is agriculture with the main crop being coffee. The village people raise their own crops but coffee is the main cash crop involved.

An interesting note on the agricultural aspect was revealed when Linda remarked about the farmers' crops.

"When the crops fail or a natural disaster occurs such as the Honduran flood, the farmers must absorb their own losses as the government offers no subsidies."

In some of the cities, industry offers some employment however not enough to substantiate the whole country.

The work always keeps Linda busy although she admitted that there is some free time for swimming and going to movies in the main cities.

Linda has been a volunteer for the past year and a half and is planning on continuing her work with the Honduran people.

Linda has been a member of Farm Women Society 3 and plays the piano as well as sews when she is home. She was also a member of the Jolly Caterers and the Lincoln 4-H Club.

While not every young person can travel to other countries Linda has much moral support behind her as the young people's group of her church appreciates the work she has done.

A few weeks ago when she was home for a vacation, Linda received a silver plate from the group inscribed with a message that reinforced their pride and appreciation of her work.

In appreciation of her volunteer work, Linda's friends at the Swamp United Church of Christ recently presented her with an inscribed silver tray.

Lancaster 4-Hers Receive Honors At Annual Banquet

Nine Lancaster County youths were honored on Thursday evening at the annual Red Rose 4-H Baby Beef and Lamb Club banquet.

Bob Hess, son of Mr. and Mrs. Gerald F. Hess, Lancaster RD2, received the Landisville Jaycees trophy for exhibiting the reserve champion steer at the Pa. State Farm Show.

Ken Brubaker, son of Mr. and Mrs. Clyde Brubaker, 2418 Harrisburg Pike, also received honors for his work at the Farm Show. Ken showed the champion Hampshire ewe along with the reserve pen of market lambs for the fourth straight year, for which he received an award from Wenger's Feed Mill in Rheems.

Sarah Lynn Brubaker, sister of Ken, was presented with a bowl from the Pennfield Corp. for exhibiting her market lamb to championship honors at the Farm Show. Sarah also showed the reserve champion Hampshire ewe in the junior breeding show.

Susan Herr, daughter of Mr. and Mrs. Carl Herr, Penn Grant Rd., collected numerous trophies at the 4-H event as she received a trophy from the Farm Credit Association for exhibiting her steer at the Farm Show along with collecting a trophy from Grubb Supply Co., for the best showman in the baby beef category. Susan's third award came from Agway which represented her exhibiting one animal in the reserve champion trio in the lightweight division at the Farm Show. The award was shared by Susan Martin Pequea RD1 and Joe Lefever Manheim RD4.

Receiving awards for their entries in the trio divisions at the Farm Show were: Middle weight: Tom Good, Lititz RD2; J. Ronald Zimmerman, Stevens RD1, and Gregory Greider, Columbia RD2. Trophies for the division were presented by Nelson Weaver Feed Company.

The grand champion light heavyweight trio winners were: Bob Hess, Tim Hess, Lancaster RD2 and Gary Brubaker, 345 Runnin Pump Rd. The three youngsters in the category received grand champion honors at the Farm Show and were awarded trophies by the Pennfield Corp.

Best junior showman in the lamb show was presented to Christian Herr, Narvon RD2, son of Dr. and Mrs. Robert Herr. The Earl Sauder Mill presented the youth with a desk - pen and pencil set.

Ken Brubaker won two other awards before the evening program concluded by capturing a trophy for the best senior showman of lambs which was presented by Cope and Weaver while also receiving a plaque for junior livestock trio judging presented by the Pennsylvania Pork Producers. Brubaker shared the judging award with Gary Eberly and J. Ronald Zimmerman.

Youths Needed For Conservation

The Department of Education is recruiting youths between the ages of 15 and 19 to work in Youth Conservation Corps projects this summer, including some on State Park and State Forest Lands.

YCC projects will last from four to eight weeks and will have room for approximately 382 enrollees, including 218 youths assigned to six residentail camps and 164 commuting to projects at 21 non-residential sites.

The purposes of the program are to:

- Accomplish needed conservation work on public lands;

- Provide gainful employment for youth from all backgrounds; and

- Develop an understanding and appreciation in the participants of the Nation's environment and heritage.

Enrollees will be chosen from among all completed applications by using a computerized random numbers table.

Application forms are available from secondary school guidance counselors.

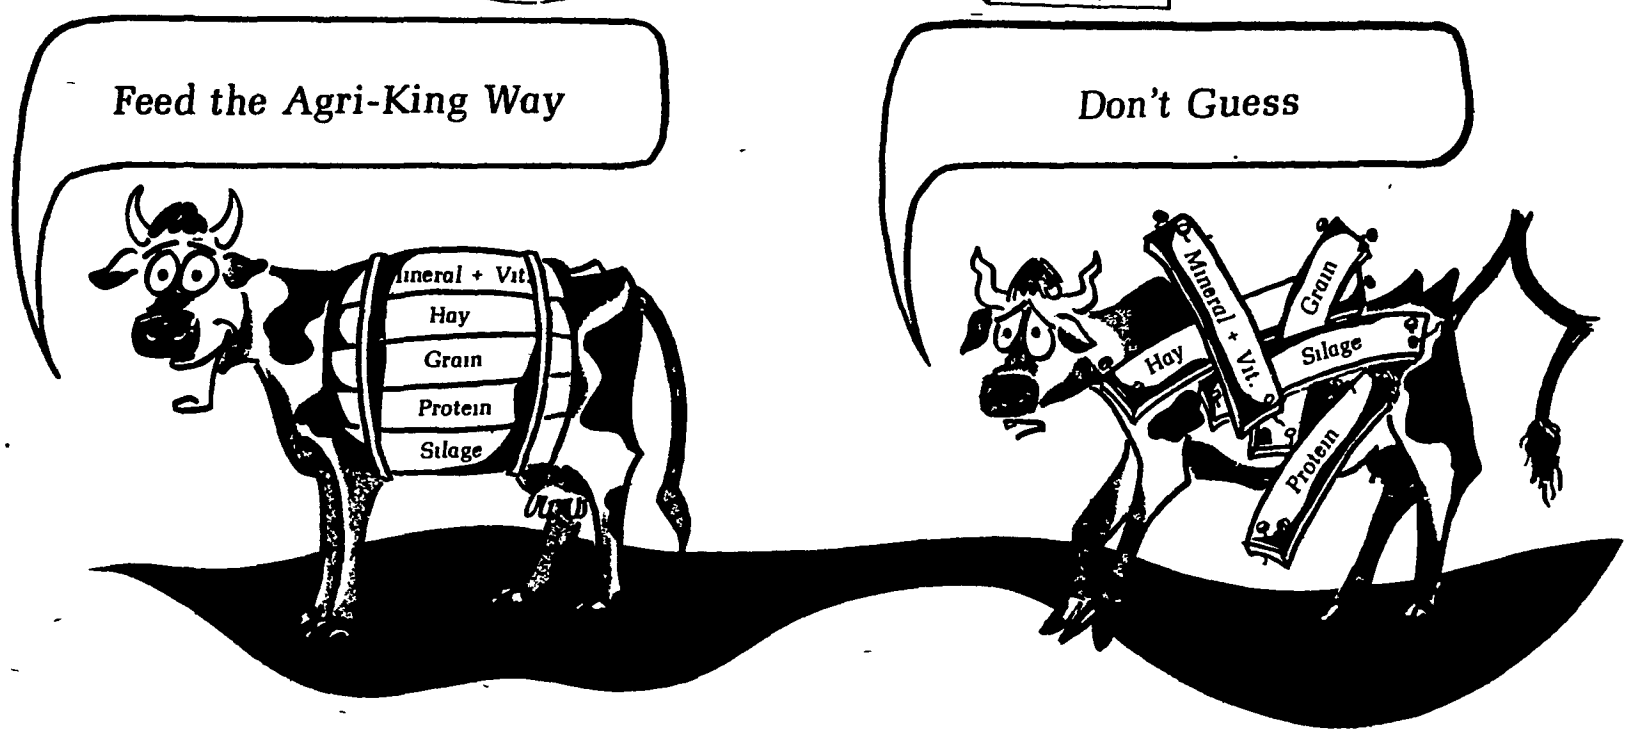
Work assignments depend on the needs of the area but can include clearing stream banks, building trails, tending fish hatcheries, planting trees, constructing Park facilities and improving wildlife habitat.

Residentail enrollees receive full meals and lodging plus about $46 per week while non-residential participants will receive approximately $60 per week.

A program spokesman said that only those applicants selected for positions will received notification from the State. The notices will be sent out by April 1.

In the Jan. 25 issue of Lancaster Farming, Dr. Paul Hand, assistant general manager of Inter-State Milk Producers Cooperative, was quoted as saying that milk should be withheld for two days from cows that have been treated with antibiotics. The correct withholding period is four days.

KEY TO PROFIT
AGRI KING, inc.
PERSONALIZED FEEDING PROGRAMS
FULTON, ILL.



BERKS COUNTY FARMER TELLS WHY HE QUIT THE AGRI-KING PROGRAM!

Testimonial

"I started on the AGRI-KING feeding program on August 1, 1973. By January 1974 I was persuaded that the AGRI-KING program cost too much, but I did feel that AGRI-KING was on the right track by feeding energy to high producers. I was getting more milk than I ever got in my life. I was feeding shelled corn, soybean meal, dical calcium and the AGRI-KING products. A local feed man convinced me to switch to a supplement and shelled corn because it was cheaper to make a ton of feed. My cows that were milking 65 to 70 lbs. milk dropped to 50 to 60 lbs. milk and this happened within a week. I had fresh cows over this time but the milk in my bulk tank kept dropping.

Within two months I knew that I badly needed AGRI-KING again. I learned that I cannot gauge my dairy operation by what it costs to buy products but by what it cost me to produce 100 lbs. milk. While off the program, according to my records, my feed cost per ton was cheaper, but my feed cost to produce 100 lbs. of milk was higher.

So on April 14, 1974 I called the AGRI-KING serviceman to take samples and get me started on the program again."

Farmer's name withheld to avoid embarrassment to the local feed company.

Farm Management Handbook

A successful farm manager must develop two plans of work - a short-run plan used to evaluate next year's operation and one based on a sufficiently long period of time to permit changes or adjustments in land, labor, capital, and management, according to a "Farm Management Handbook" published by The Pennsylvania State University's College of Agriculture.

"There are a number of ways to improve farm income and not all of them involve increased size nor do they always require the expenditure of capital," says Dr. Virgil E. Crowley, Penn State Extension farm management specialist and one of the book's authors.

Doing things at the right time often produces more income; reducing costs means more net income; and often a reorganization of the crop and livestock enterprises can increase income significantly, Dr. Crowley points out.

The handbook, developed by five Penn State farm management specialists, includes data which will be helpful to farmers and individuals assisting farmers with various management problems and with the development of farm-operating plans.

One section discusses farm management, the role of the farm manager, problems of the decision-making process, and the construction of partial and complete budgets.

Another section is devoted to dairy budgets and related information, and still another area deals with budget information for the major livestock enterprises such as swine and beef. A remaining section includes budget information for fruits, vegetables, and field crops.

The 130-page book may be purchased for $2.50 plus 6 percent Pennsylvania sales tax. Make check or money order payable to The Pennsylvania State University and send with your name and address to FARM MANAGEMENT HANDBOOK, Box 6000, University Park, Pa. 16802.

Consumers' Corner

Save On Dialing

Direct distance dialing is the consumer's best way to save on the phone bill A person to-person call is always at least two times as expensive than dialing station to station

Call between 11 p m and 8 a m for your best bargain The minimum to one minute charge runs 35 cents, plus 20 cents for each additional minute during that time Many companies which use computers to transmit info over the phone take advantage of this bonus

Costs also drop when you dial direct between 5 and 11 p m, Monday through Friday and Sundays, too There's a savings of 60 cents on the first three minutes A 52 per cent cu is available all day Saturday and until 5 on Sundays

Interestingly enough long distance calls made within an individual state are usually higher per airline mile than calls made across state lines

When calling from home don't use that credit card for business calls A surcharge is levied because the operator must assist Dial direct and claim it on an expense account Use the credit card for calls inside the same state — when calling from a hotel They can add a service charge to such calls

Hamburger Sale

(Continued From Page 1)

Wyaloosing. All the licenses and permits have been obtained, and Charles said he doesn't expect any problems to develop during Monday's activity.

The meat will be sold at the Town & Country parking lot of the East Park Shopping Center, Derry Street, Harrisburg. The sale will start at 9:30 and last till about noon. Buyers will be paying $5 for a five-and-a-half pound package of lean hamburger, which figures out to about 90.9-cents a pound. "And this is a quality product," Charles noted. "We're grinding up everything for this hamburger, not just the trimmings. The rounds, the T-bones, the steaks, everything is going into the product. It will be 80-percent lean. You can't buy that in the supermarket."

Charles said all the profits from the sale will go back to the farmers. And he's confident the return to the farmers will be better than those they'd get if the animals were sold at auction. "We're getting about sixteen-and-a-half-cents for our cull cows from the packers," Charles said. "We bought some culls at auction the other day, just to prove our point, and we sold the hides for 17.1-cents a pound. Why should meat be selling for less than hides? It doesn't make sense."

How well does he expect the NFO farmers to do with their cull cow meat on Monday? "I think we're going to be returning 26- to 29-cents to the farmers," Charles said. "We can hold one of these sales every day in central Pennsylvania, and if that's what we have to do to get auction prices up, that's what we'll do. We know we can influence the market price by collective action, because NFO movements have done it before. And if we start taking 30 cull cows a day off the market, we'll pretty soon see a better price for those cows."

James Brown, a Halifax beef farmer and Dauphin County NFO member, said he has high hopes for a successful sale. "The farmers I know need to do something about their returns," he told Lancaster Farming. "They'll be there working on Monday, too. The farmers will be selling, they'll be driving the trucks from the packing plant, and they were there to watch the slaughter."

Brown said he expects about 50 farmers to be on the scene to help on Monday. He added that the NFO is actively recruiting members in the Dauphin County area. An open meeting for anyone who's interested has been scheduled for Wednesday, Feb. 12, beginning at 8:00 p.m. in the band room of the Halifax Area High School. Brown said the doors would be open to all comers.

Sensenig Appointed

Lancaster Laboratories has announced the appointment of Richard Sensenig to the office of Sanitationist for the company.

Sensenig received his A.B. degree in liberal arts from Eastern Mennonite College and received his Master's degree from Northwestern University.

As Sanitationist, Sensenig will be responsible for a wide range of duties that will include inspecting food processing plants for sanitary conditions, evaluating and recommending sanitary programs as well as quality control programs for firms along with inspecting farms under state and federal programs.

Sensenig resides with his wife and four children at 1021 Pine Hill Rd., in Lititz.

CHECKLIST for buying a gutter cleaner

If you're now looking for a gutter cleaner be sure it has all these important features

- One piece chain link with hook and eye for heavy duty 4 way flexibility
- Angled flites for added efficiency
- Wear shoe on each flite a full half inch thick for longer flite life
- Flites welded to links — fewer parts to corrode
- Easy link removal in 10 seconds — without tools
- Removable corner wheel assemblies to eliminate cement break out
- Flanged corner wheel to guide chain and protect gutter floor
- 4 Tooth drive sprocket reduces strain on reducer
- Sprocket and roller chain reducer for complete dependability
- Flite cleaner engineered to serve right and last long
- Automatic chain tightener works with full or part load
- Continuous duty motor eliminates motor overheating
- Telescoping slide legs for easy slide adjustment
- Chilled cast hold down shoe for longer shoe life
- Chain oiler for lubrication and corrosion resistance

The only gutter cleaner which gives you ALL these vital features and more is the PATZ Gutter Cleaner Designed by a farmer for farmers this unit will provide years of labor saving trouble free service

Pesticide Supplies Seen Tight in '75

Despite spiraling demand for crop protection chemicals during a period of short supply, enough pesticides should be available to protect planted acreage in 1975, according to H. L. Straube, vice president and general manager of the Agricultural Chemicals Division of Stauffer Chemical Company. Straube spoke at the recent annual meeting of the Southern Weed Society, and told the ag scientists there, "Our industry is still experiencing some severe shortages, we're still allocating all the product we can make, and the overall supply situation is still tight." He noted, however, that shortages of certain raw materials or feed-stocks have eased somewhat during the past 60 days.

"As of right now, increases in raw materials prices have been slowed but no stopped. We have seen no reductions in prices," he said.

Mr. Straube warned, however, the pesticides will remain in tight supply for the long term until increased plant production capacities can catch up with demand.

With some 40 million additional acres brought into production during the past two years, he pointed out that only about 10 percent more land in the U.S. could be placed under intensive cultivation than was used in 1974.

"To meet the intensive demand for greater yields," he said, "The farmer will have to use every available technological means available to him, including pesticides, to get maximum production."

He noted that "growers have looked to pesticides, particularly herbicides for weed control, as a key ally in this battle." Mr. Straube pointed to U.S. Department of Agriculture statistics which showed that a chemical weed control was used as standard farm practice in 1972 on more than 150 million acres, or about 50 percent of total harvested crop acreage for that year.

"As more marginal acreage is forced into production, demand for herbicides will be even greater in coming years," he pointed out.

The most significant factor affecting the outlook for long-term pesticide shortages, however, is demand for more food exports. "The United States is only one of four countries that are significant net exporters of food," he stated. "The significance of the United States' role is measured by the fact that our exports exceed the combined total of the other three exporting nations," Mr. Straube added. Since other developed nations lag behind the U.S. in farm technology, the U.S. will have to play a major role in helping feed the starving nations of the world, he concluded.

Dairy Reference Manual

During this decade of the "management revolution" the professional dairyman needs many facts in reference form to make sound operational decisions.

"At the same time, ag industry personnel who service modern dairy farms need factual resource information to properly advise the new breed of dairymen," said Donald L. Ace, Extension dairy specialist at The Pennsylvania State University.

To assist those in the industry, the Penn State College of Agriculture has published a "Dairy Reference Manual" designed to be a catalog of facts for professional dairymen and personnel who furnish supplies and services to the industry.

Ace, who is one of the book's authors, says topics covered include milk quality and product technology, diseases and parasites, breeding and selection, physiology of reproduction, feeding, milking equipment, structures and barn equipment, and farm management data.

The 216-page book may be purchased for $3.00 plus 6 percent Pennsylvania sales tax. Make check or money order payable to The Pennsylvania State University and send with your name and address to DAIRY REFERENCE MANUAL, Box 6000, University Park, Pa. 16802.

FEA Administrator Says Rationing Gas Too Drastic

Rationing of gasoline to reduce our dependence on imported oil must be regarded as the very last and most drastic measure, according to Joseph A. LaSala, Regional Administrator for the Federal Energy Administration.

"When the American people fully understand the ramifications of what rationing means, I am convinced they will support the alternatives being advocated by President Ford," LaSala said.

"Instead of long lines at gasoline stations, we may see long lines at Post Offices as the Nation's 140 million licensed drivers que up for their coupon allotments," he said.

LaSala said those favoring rationing also should consider the enormity of the bureaucracy necessary to operate it. FEA estimates the cost at about $2 billion and would inject government in may new aspects of each American's every day life.

"To reach the President's goal of lowering imports by one million barrels per day this year, a rationing system would permit the average motorist only 36 gallons per month as compared with the current useage of 50 gallons per month," he said.

Although each person would receive an equal number of coupons, the use of gasoline varies widely among drivers. Many persons who require more than 36 gallons would be forced to purchase coupons on the "White Market" from drivers who do not use their 36 gallons, he said.

"This gives rise to serious inequities between rural, suburban, and urban dwellers and would impact heavily on some very poor persons, such as migrant workers who are forced to drive long distances each year," LaSala said.

He noted that while rationing may limit consumption in the short run, it makes no contribution to the middle and long term goals of energy independence since it provides no incentive for increasing the domestic supply of oil. Rationing also cannot be sustained over a long period of time in circumstances short of war.

"The days of cheap and plentiful energy are over. Our problem now is trying to make the best of a difficult situation, and there is no easy way out," LaSala said.

"The tax on imported oil will permit the time-tested principles of the marketplace to work on lowering consumption. If that fails, we can always turn to other alternatives," LaSala said.

LaSala is Administrator for Region III, which consists of Pennsylvania, Maryland, Delaware, West Virginia, Virginia, and the District of Columbia.

Natural Gas Curtailed Affects Pa. Economy

U.S. Senator Hugh Scott (R-Pa.) recently protested the curtailment of natural gas to Pennsylvania and called upon the Federal Power Commission to "ensure maximum production and equitable distribution of our nation's natural gas."

In a letter to John N. Nassikas, Chairman of the Commission, Scott said the Commonwealth is dependent on interstate pipeline companies for more than 92 percent of its natural gas supplies.

"Two of the pipeline companies, Texas Eastern and Columbia, have already announced major curtailments," Scott said. "Normal winter conditions will result in a 30 percent curtailment of interruptible customers. Even if sufficient quantities of substitute energy sources were available, a great many industries do not have the facilities to switch during the period of curtailment. The potential impact on employment and the overall economic environment is great."

Scott said the oil embargo "dramatically pointed out that the Northeastern United States is heavily dependent on imported crude and petroleum based products. As a result, in the Northeast the shortage was more acute and the price of the product substantially higher than the national average. For this reason, I supported consideration of a program to require a uniform nationwide price for petroleum products and also the recently promulgated crude equalization program."

In the letter, the Senate Republican Leader called the situation "critical."

"The public must be assured that government and industry are making every effort to meet peoples' needs," he added.

Thought That Counts

That son of mine is something else He gave me a really wonderful card for Christmas It took him months to make it — 'cause it reads HAPPY FATHER'S DAY

Consumer Protection Hosts Speaker On Crime Prevention

The regular monthly meeting of the general membership of the Consumer Protection Commission of Lancaster County was held on Thursday, February 6, at 7:30 p.m. in the Council Chambers of the Public Safety Building, 208 N. Duke St., Lancaster.

Featured speaker for the meeting was Ronald W. Bair, who is a Crime Prevention Officer with the Lancaster City Police. Officer Bair has been on the force for seven years and is a graduate of Harrisburg Area Community College with a degree in Police Science and Management.

Officer Bair's topic involved advice to the consumer on how to deal with door to door salesmen, charitable solicitors, inspectors and repairmen. He also discussed local and state laws that protect the consumer.

Recent changes have occurred in the chairmenship of several committees of the Commission.

Mr. Chester Shank of Manheim, has taken over the Investigating Committee. He plans to work first on depleting the backlog of cases to be investigated. During the last 3 months of 1974 16 cases were closed: 7 concerning home maintenance, 4 on home appliances, 3 car warranties and 2 security deposits.

The Program Committee has been put in the hands of Mrs. Louise Beltz, of Lancaster. She is responsible for bringing the Speakers to the General Membership meetings that are held the first Thursday of the Month. She hopes to provide programs of interest to all consumers in the near future.

Mrs. Mary Miller, of Lancaster, has accepted the Chairmanship of the Speakers' Bureau, which is responsible for providing other local civic organizations with representatives of the Commission to speak on the Commission and other consumer oriented subjects.

Civil Service Needs Geologists

The State Civil Service Commission has announced limited opportunities for fulltime summer employment as a geologic aide with the Department of Environmental Resources.

Except for a few positions in Altoona, Muncy, and Pittsburgh, most of the jobs will be located in Harrisburg. The actual number of positions, their locations and duration will depend on agency needs and availability of funds.

A written test is not required for the positions. Applicants will be rated on their education and experience in the field of geology as reported on the civil service application and the training and experience supplement.

Applications will be accepted continuously until Friday, March 21, 1975. A list of eligible applicants will be established as soon as possible after applications are received.

Inflation

This year I'm going to give my wife something worth $50 — guess it'll have to be a $100 bill!

Be Sure

Last Christmas we gave our 12 year old a chemistry set Not too long ago he held up a vial and yelled "Lay one finger on me and we'll all go up together!"

With your farm background . . .

Your Future May Be Brighter Than You Think

We know, and you know, that there just aren't enough farms available for every rural youth who would choose farming as his profession.

But there is a good alternative, in thousands of agriculturally related businesses. As farming takes on greater and greater importance each year, opportunities multiply for the agri-business industries furnishing the supplies and services farming requires.

Take your choice. Teaching, research, manufacturing, marketing, communications — you name it — the opportunity for you to contribute is unlimited.

The challenges are exciting; the rewards can be great. And you'll still be making an important contribution to agriculture.

How do you start? If you have the background or the interest, write to your State Agricultural College Admissions Office, or Agricultural Communications Department for more information.

Almost Everything Starts on a Farm

If it wasn't for the farmer, we wouldn't have the good foods we eat.

Or fibers for the clothes we wear. Or leathers for our shoes. Or the papers, inks and chemicals that are so much a part of our everyday lives.

Maybe it's time we acknowledged the farmer's contribution to the good life we live.

We'll have that opportunity on . . .

Agriculture Day
march 24

All these things and more start on a farm . . .

- wool, cotton yarns and rugs
- cosmetics, soaps, resins.
- meats, fruits, vegetables, cheese, milk, sugar, cereals
- chemicals, pharmaceuticals.
- rubber, paint, inks, papers

F&M Offers 'Et Cetera' Continuing Ed Courses

Franklin and Marshall College is offering 22 non-credit courses this spring in its new "Et Cetera" continuing education program. The courses are grouped into five categories, including current concerns, leisure, personal advancement, law for the layman, and language for beginners.

Topics range from "communicating with children," "fighting inflation," and "writing a family history" to "Lancaster County architecture" and "consumer law."

Stephanie Tolan, coordinator of the program, said today most of the courses will begin the week of February 18, and will meet once a week for five weeks. Tuition ranges from $15 to $40, depending on the course.

Individuals interested in the program can call or visit F&M's office of special programs Monday through Thursday from 2 to 7 p.m. or on Friday from 2 to 5 p.m. to obtain the "Et Cetera" brochure or to register for courses.

The telephone number for the office, located in Hartman Hall, is 393-2621 during day hours and 299-0068 in the evening.

In addition to the courses scheduled to start in February, five others are in the planning stage, to start in either March or April, according to Ms. Tolan.

These include "survival gardening," "creative writing," "technical writing," "early American crafts," and "fund raising." The course in fund raising is being geared to the needs of local non-profit groups.

The full listing of courses at F&M this spring, and the starting date for each, includes:

Current concerns--"Rape", Feb. 20; "Aging," March 11; "Communicating with Children," Feb. 25; "Fighting Inflation," Feb. 18; "Trace Element Geochemistryand Health," Feb. 26.

Leisure--"Paperbacks and Coffee," Feb. 19; "Writing of Family History," Feb. 22; "Opera: On and Off the Record," Feb. 18; "Lancaster County Architecture," March 20; "American Folk Music and the Guitar", Feb. 18.

Personal advancement--"Let's Talk", (public address), Feb. 18; "Literary Symbols," Feb. 20; "Reading and Study Skills," Feb. 19; "Speedreading," Feb. 19.

Law for the layman--"Consumer Law," Feb. 18; "Real Estate Law", Feb. 19; "Family Law," Feb. 18.

Language for beginners--"Turn-a-Phrase in Spanish," Feb. 26; "Turn-a-Phrase in French", March 12; "Turn-a-Phrase in German," Feb. 19; "Conversational Hebrew," Feb. 27.

Christmas Seals Stuck For $

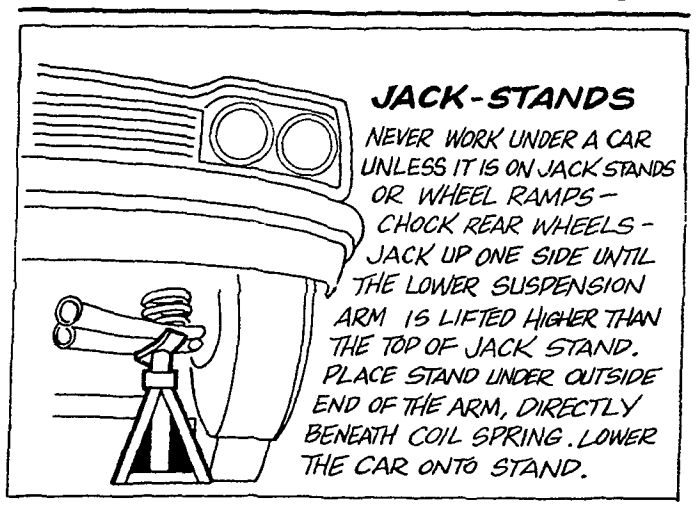
The Lancaster County Lung Association reports that the Christmas Seal Campaign receipts now total $71,027. This is still $14,973 short of the $86,000 needed to conduct services for the next fiscal year starting April 1, 1975.

In an effort to make up the deficit contributors will be asked to make an additional contribution. Contributions are especially needed to finance the newly established Pulmonary Function Screening program which has been offered monthly since April 1974. The purpose of the screening is to detect early signs of breathing impairment so that it can be treated and disabling lung disease prevented.

Christmas Seal contributions support other services such as supervision for Emphysema patients using mechanical equipment at home, loan of breathing machines, as well as tuberculin testing, chest x-ray and information on hazards of smoking and air pollution.

Eighty percent of all contributions will be used for services in Lancaster County. Only 20 percent is allocated for the administration of State and National programs such as research and education.

Automobile Service Tips



JACK-STANDS
NEVER WORK UNDER A CAR UNLESS IT IS ON JACK STANDS OR WHEEL RAMPS— CHOCK REAR WHEELS - JACK UP ONE SIDE UNTIL THE LOWER SUSPENSION ARM IS LIFTED HIGHER THAN THE TOP OF JACK STAND. PLACE STAND UNDER OUTSIDE END OF THE ARM, DIRECTLY BENEATH COIL SPRING. LOWER THE CAR ONTO STAND.

FARM PROPHESY

God warned in history, also for present time. First Chap. of Joel should make you think. Rejectors suffered seriously in history; will again. AGRISERUM really helps in drought and pestilence through many more soil bacteria and earthworms, resulting in spongy, water holding soil and enormous roots to tap the water. Proven 28 years. Soil gets better year after year, diminishing need for fertilizer, and plows easier. Crops have more protein and minerals. Almost unbelievable low cost. Free testimonial book. Eli L. Stoltzfus, 69 Strasburg Pike, Lancaster, PA 17602.

Livestock For Sale

MULES & HORSES

I just received several trailer loads of mules and horses, some of the biggest and best you will see in the County.

If you need mules, call the man that knows mules: C. N. Weidman, Mule Salesman.

Melvin Kolb, Inc.
621 Willow Road
Lancaster, PA
Telephone:
393-7459 or
393-6891

For Sale - Large thoroughbred gelding, 14 year old exrace horse, willing jumper, need experienced rider. Can board $2.00 per day. Best offer over $750.00 Phone 717-872-4465.

For Sale - Registered Holstein bull, proven sire. Dam, Cold Spring Cam, 22,000 lbs. of milk and 672 lbs. of fat. His calves look terrific. Too closely bred to use in own herd. c-o William Jonas, Perkins Cold Spring Farms, Pleasant Mount, Pa., Wayne Co. 717-448-2330.

CHAROLAIS

Calves from the bull you use this year will be sold in 1976. Things should be better then, but good or bad, you will want the most dollars possible per calf. Calves from one of my Performance Tested Purebred Bulls will bring you $25-$50 more per calf. Charolais now more than ever.

Mrs. Evelyn Hess

Crafts Have Been A Part Of Her Life

by: Melissa Piper
Associate Editor

Crafts of all types and descriptions have become increasingly popular over the past few years; however, for Mrs. Melvin (Evelyn) Hess, Hunsucker Rd., Lancaster, crafts have been a part of her life for some time.

Mrs. Hess is one of a very few women who paint tinware and furniture as a hobby. The work takes time, patience and a real understanding which limits the number of individuals interested in pursuing such a craft.

Mrs. Hess first became interested in painting by watching her sister paint minature furniture as a child.

"An Amishman used to make minature wooden furniture for us and my sister would paint designs on the small settees and dining room suites."

"Ocassionally, I would help her with the work and became interested in painting."

Painting designs on tinware took some instruction and Mrs. Hess learned as an apprentice from an area woman who had done much of the tedious work. Mrs. Hess proved to be an interested student and today has many works of beauty to substanciate her skills.

To paint tinware and furniture, oil paints are employed. The actual designs may either be traced on the object or painted on free hand. Mrs. Hess has done numerous trays, tin pots and watering cans with floral and fruit arrangements as well as with scenes she has remembered.

Painting furniture is also a painstaking work as Mrs. Hess usually refinishes the furniture before the actual design painting is done. She has done several chests, decorating them with colorful designs and has also refinished bedroom suites and odd pieces of furniture.

When asked how she decides what patterns to employ on a certain piece, Mrs. Hess admitted that it is not as easy as it may seem.

"Some of the patterns are old ideas that have been used for many years," she explained, "and others I just design or sketch from things I have seen while traveling."

One piece in her collection is a tray decorated with bluebirds resting on branches of blossoms. Mrs. Hess said she has seen a decoration to that effect on a card and adapted it to her idea for the tray.

Not much of the modern furniture of today is hand painted as it was some years ago. Most of the decorated furniture today is imported from the European countries and Italy, and bears the designs of a few artists. Thus, Mrs. Hess has become one of a very few artists to keep the art of design painting alive in this country.

Mrs. Evelyn Hess displays one of the many trays she has decorated with an oil painted design.

Another Hobby

One would think that painting as a hobby would be too time consuming to even think of having more. However, Mrs. Hess also takes pleasure in flower arranging.

Most of the flowers that she uses in flower arrangements are grown by herself during the summer and dried or preserved for winter arrangements. Mrs. Hess uses status, straw flowers, baby's breath, money plant and zinnias along with many other varieties to give her arrangements many different moods and textures.

The money plant, a flower with rounded disks as blossoms, is quite effective and Mrs. Hess uses the plant for a distinct oriental effect while she combines zinnias, baby's breath and numerous other varieties to create a Williamsburg type bouquet.

One particularly interesting arrangement that she created consists of dried flowers and birds arranged in the center of a glass lamp. The glow of the lamp lends a warm yellow and gold effect to the arrangement, making it seem quite real, as if the viewer were looking at a minature flower garden.

Many baskets of dried flowers laced with the delicate hues of the purple status and orange of straw flowers grace the Hess household along with line arrangements with painted tin pitchers as their base.

Her favorite piece of work, Mrs. Hess displays the rug which she hooked using pieces of wool fabric. In the background is one of the many arrangements she has made with dried flowers.

Rug Hooking & Decopauge

Along with her regular crafts, Mrs. Hess has done some decopauge work for her children as presents. Mrs. Hess admitted that although the work was fun, it was also very time consuming as the decopauge procedure takes quite some time.

An area farmer cut the wood for Mrs. Hess's pictures and with old prints she had, Mrs. Hess created pictures that were quite beautiful.

Decoupage is an old art which is accomplished by pasting a picture or print on a sanded piece of wood. The wood is then covered with layers of varnish or a decopauge finish which gives the finished product a dimensional appearance.

Mrs. Hess did 18 pieces for her children with each picture requiring over thirty coats of finish.

Hooking rugs has also been a favorite past-time for Mrs. Hess, who has become quite noted in that craft field. Mrs. Hess took a course in rug hooking at the Landis Valley Museum several years ago and started working on her own.

The one piece which brought attention was a rug with a rose design which she made by tearing strips of wool to achieve her design.

"Finishing the rug took quite awhile as I combed the area auctions buying old wool coats to use for the fabric," she explained.

"Often I had to dye the material until the certain hue I wanted was obtained."

It might have taken much time, however the finished product was quite worth the effort. Mrs. Hess traveled to several areas to explain rug hooking and displayed her favorite accomplishment which received many compliments.

Along with her many interests in crafts, Mrs. Hess is also a member of Farm Women Society 18 in Lancaster County and in her spare time likes to visit with people in the area who need company.

It is with these individuals that she shares her faith and friendship often sharing reading material of a religius nature that she feels will be of help and guidance.

And besides her other duties, Mrs. Hess likes working in her family's garden and cans numerous varieties of vegetables for the winter use.

Mr. and Mrs. Hess have four sons. Ken is a research worker at the Columbia University Medical Center; Mel is a law student; Don teaches school in Egypt and Rick, the youngest, is a senior at the Lancaster Mennonite High School.

A busy woman—yes, but Mrs. Hess usually seems to find the time for a little bit of all her favorite crafts. In fact, her present project is refinishing a jelly cupboard that belonged to her parents.

Country Corner

with: Melissa Piper
ASSOCIATE EDITOR

This week in Lancaster County, we experienced our first major snowstorm. Nearly six inches of powdery flakes blanketed the country side making the trees and houses seem like lonely silhouettes. All the weather might have embarrassed the groundhog yet hopefully spring will not be too far behind

For many in this area and all over the state, spring will bring with it a myriad of activities to keep people busy. There will be plots to ready for the family garden, flower beds to prepare for the summer annuals and of course acres to be plowed and seeded for the summer crops.

While there is still a lull before the rush, now is a good time to order seeds, clean and prepare garden tools and check machinery for loose belts, broken bolts and worn out parts

Spring Check-Up

With horse health problems now more complex than ever, it is adviseable to arrange a spring check-up for your horse Regardless of whether your horse is for pleasure or work, he still requires attention at this time. Veterinarians can check for internal and external parasites as well as vaccinating your animal if required

Your veterinarian might suggest a vaccination for **Clostridium tetani**, commonly known as tetanus, since many horses are prone to injuries and cuts

Other vaccinations you might consider for your animal include those for influenza and strangles contagious infections and those for encephalomyelitis or sleeping sickness

Thorough examination of your animal's vital organs, teeth, eyes, ears and feet are also an important part of a spring checkup

For more information on a spring check up for your horse or pony, please consult your veterinarian

Read Country Corner next week for some consumer news and tips

LADIES HAVE YOU HEARD?

By Doris Thomas, Extension Home Economist

ON CONSERVING ENERGY

The amount of energy used to heat water for your home should be carefully considered if you're trying to conserve energy. Almost 15 percent of the energy used in the home is used to heat water. Hot water, 140 degrees F, is needed for best results in automatic dishwashing and laundering white and colorfast cottons and blends. Hot water is needed to assure sanitation and the best detergent action in your washer and dishwasher — and to inhibit streaking and spotting in the dishwasher. There are ways that you can make certain that you get the most out of the water you heat — without dropping your setting below the 140 degrees F.

1. Change your habits and use cold water for rinsing clothes (this will affect laundry results less than cooler water for washing).

2. Stop any hot water leaks — check all outlets.

3. Insulate hot water pipes so you don't heat more water than you use.

4. Cut down on hot water for personal use such as showering instead of bathing (you can turn the water off while you're soaping ... even that helps!).

To cut down on the use of energy by refrigerators or freezers try the following suggestions.

You might consider lowering the room temperature in the winter when you are adding heat to the kitchen (refrigerator-freezer) area. For example if in cooling refrigerator air from a room at 72 degrees F to 32 degrees F the temperature must be lowered by 40 degrees F . . . if the room temperature is reduced 6 degrees F, the interior needs only be dropped 34 degrees F — a saving of about 15 percent.

You might also be sure to isolate the refrigerator from heat sources such as the sun, heaters, or the range. These sources make heat enter the refrigerator faster so it must run more.

"Promote proper energy exchange" means to allow space for the condenser coils on the back of the refrigerator — and keep coils dust free. Defrost regularly before frost is ¼ inch thick. And, of course, try not to open the refrigerator (or freezer) door more than necessary. Make each opening count.

The refrigerator temperature should not be set higher, nor the food cooled to room temperature before refrigerating. To protect the quality and safety of foods you should refrigerate food as soon as possible.

In purchasing a new refrigerator, however, it is wise not to buy a refrigerator that is much too large because it uses extra energy, naturally, to keep the extra space cool. You should check for a good insulated box. Some refrigerators have a high-low humidity switch. Keeping the switch at "low humidity" setting (except when condensation might form around the door) may save up to $15 in electricity costs per year.

BUYING FABRICS ON SALE

When fabrics are on sale you may be able to buy quality items you might normally feel you can't afford. Don't get carried away by a big markdown. Nothing is a bargain unless you have a use for it. Remember, sale merchandise is usually not returnable. Money spent for fabric you will never use is a poor investment compared to the same amount spent for something you will use often.

Keep in mind that styles could change and your fabric could be out of fashion. And be careful about stocking up on velvets and other crushables unless you can store them properly. Also, buy the fabrics that were new this season because they are likely to be around next year.

If your storage is adequate and you can store woolens to prevent moth damage, you can buy some fabrics to use next year. But before you get too enthusiastic, remember that the new fabrics next fall will tempt you too, and you may wish you didn't have to make up that bargain.

Some bargains get pushed to the back of the "to make" drawer for a long time until they are out of style or you no longer like them. If you never use the fabric it's no bargain. Most seamstresses have drawers full of such bargains, so before you add any more, take stock of how much you have on hand, your clothing needs and how much time you have to sew.

Ida's Notebook

Ida Risser

It seems the image of farmers has changed over the years. No longer is he looked down on as a country bumpkin who doesn't know which side is up. Gradually, other people realize that he must have a lot of scientific knowledge and a progressive nature in order to stay on top.

A few decades ago children felt inferior if they lived on a farm but now the reverse is true and they are even envied a bit. Farms were slower getting electric lights, bathrooms and telephones but now you often find big and fancy homes on the farm.

My roots are deep in the soil and I wouldn't want to live anywhere else. Guess, I'd rather have "a piece of bread in my pocket than a feather in my hat." I just realized that my ancestors and my husband's ancestors have always been farmers.

Oh, they may have taught school for a few years or built a flour mill in their later years but their living was made growing crops on God's earth. Let us hope the farmers continue to deserve respect from their neighbors.

xxx

My father always said that "everything takes time." Now I would like to make things happen in a hurry. But, I'm afraid he was right.

A building takes months instead of weeks to finish, my watch repair takes 6 weeks instead of the 6 days, I'd hoped for, and a suit my husband ordered took 3 weeks instead of 3 days to come from Lancaster to Leola. Of course they lost the directions and couldn't look in the phone book for our number! But that didn't make it any easier to wait as new clothes are few and far between around here.

I suppose the same logic of "everything takes time" applies to all the repairs that are put off from year to year.

Outdoor Cooking

When you barbecue, you've got lots of company Almost three-fourths of America's families spend more than one billion dollars for outdoor cookery annually

Short Ribs

To obtain maximum tenderness it is best to cook short ribs slowly in a covered heavy pan or skillet right on the grill over low heat The ribs are then ready to receive a zesty barbecue sauce while broiling

Tips on Potatoes

Insert an aluminum or stainless steel kitchen nail into each potato before placing in oven. This will promote uniform baking. Don't ever attempt to bake a full-skin, mature potato without puncturing the skin - it might explode.

xxx

Peel only a narrow strip around Irish potatoes to be boiled. The skin will then come off easily when the potatoes are cooked.

xxx

If your soup is too salty, cut a raw potato in half and put it in a small kettle of soup. Boil for a short time until the over-saltiness disappears. Then remove the potato.

xxx

Hot milk is better than cold milk for adding to potatoes to be mashed. A teaspoon of baking powder added before mashing will make them light and creamy, especially if they're whipped briskly.

xxx

Peter Pan Chewies

¼ cup butter
½ cup peanut butter
2¼ cups brown sugar
2 eggs
2 cups sifted flour
2 teaspoons baking powder
1 teaspoon salt
1 teaspoon vanilla

Combine butter and peanut butter and melt. Remove from heat. Combine sugar and peanut butter mixture. Add eggs one at a time beat well after each addition. Sift together flour, baking powder and salt. Add to mixture . Press mixture into a greased 13 x 2 inch pan. Bake at 350 degrees for 20 minutes or until done. Cut into squares when cool.

Emma Hoover
East Earl

xxx

Black Strap Molasses Cookies

1 pint molasses
1 pound sugar (brown)
4 eggs
3 tablespoons soda
1 pound lard
4 pounds flour
1 tablespoon cinnamon
1 pint buttermilk

Drop with teaspoon on cookie sheet.

Lena Leid
age 12
East Earl

xxx

Jam Jams

3 eggs
1 cup brown sugar
1 cup shortening
6 tablespoons syrup
1 teaspoon soda
1 teaspoon vanilla

Add enough flour to make a stiff dough. Thoroughly chill then roll thinly. Cut with cookie cutter and stick together with frosting while warm.

Eva Leid
age 9
East Earl

xxx

Banana Jumbo Cookies

1 cup shortening (part butter or margarine)
1 cup sugar
2 eggs
1 cup mashed ripe bananas
½ cup buttermilk
1 teaspoon vanilla
3 cups all purpose flour
1½ teaspoons soda
½ teaspoon salt

Mix shortening, sugar and eggs thoroughly. Stir in bananas, buttermilk and vanilla. Stir in flour soda and salt together. Chill one hour. Drop by rounded teaspoons on lightly greased baking sheets. Bake at 375 degrees for 10 minutes. If desired, frost with a thin confectioners sugar icing.

Karen Tyson
age 11
Felton

xxx

Forgotten Cookies

2 egg whites
two-third cups sugar
¼ teaspoon salt
1 cup chopped pecans
1 cup chocolate chips

Preheat oven to 350 degrees. Beat egg whites until foamy. Gradually add sugar and continue beating until stiff. Add salt. Mix and fold in pecans and chocolate chips. Place aluminum foil on cookie sheet. Drop dough by teaspoons on ungreased aluminum foil. Place in oven. Turn off oven. Leave cookies in closed oven overnight. The following morning peel cookies off the foil. Makes 24 cookies.

Willow Street

xxx

Peanut Butter Fingers

½ cup butter
½ cup sugar
½ cup packed brown sugar
1 egg
one-third cup peanut butter
½ teaspoon soda
¼ teaspoon salt
½ teaspoon vanilla
1 cup flour
1 cup oatmeal
6 ounce package chocolate chips
½ cup powdered sugar
¼ cup peanut butter
2 - 4 tablespoons milk

Cream butter, gradually add sugars and cream well. Blend in egg, one-third cup peanut butter, soda, salt and vanilla. Add flour and oatmeal, mix well. Spread in buttered 13 x 9 inch pan. Bake at 350 degrees for 20-25 minutes until lightly brown. Sprinkle immediately with chocolate chips and let stand for 5 minutes. Combine powdered sugar, ¼ cup peanut butter and milk. Mix well. Spread over melted chips.

Karen Rheinheimer
age 9
Lititz

xxx

Eggs In Bread Nests

4 slices bread toasted
4 eggs
½ teaspoon salt

Make toast and sprinkle with boiling water. Butter slightly and beat egg whites until stiff. Put on toast the shape of a nest. Drop yolk in the depression and sprinkle with salt and pepper. Bake at 325 degrees until delicately brown about 25 minutes. Serves 4.

Executive Board Meets

Members of the Farm Women Society of Lancaster County attended an executive board meeting at the home of Arlene Eshelman, Society 25, Tuesday, February 5.

President, Mrs. Carl Johnson, and co-hostesses were Ruth Landis, Society 18 and Helen Rohrer, Society 28.

Communications from LARC and Conestoga View in appreciation for the County Project donations and monthly visits were read. A letter from the Harrisburg State Hospital requested help with weekly mending.

Mrs. Johnson advised members that the Fashion Show at the State Convention in 1976 will consist of Centennial Colonial dresses and members should start planning for that event.

Mrs. Helen Hess, Second State Vice President, announced that scholarship applications were available with May 1, 1975 as a deadline for all entries.

Mrs. Johnson appointed the following Program Committee for the County Convention in November: Nancy Balmer, Chairman, Hazel Ulrich, Grace Bixler, Helen Reist and Mae Donough.

Dauphin County extended individual invitations to each society for the Tenth Spring Rally to be held April 30 at the Hershey Convention Center. For reservations mail a self-addressed, stamped envelope to Mrs. Stanley Etzweiler, RD2, Halifax, Pennsylvania 17032. Ticket cost is $6.00 and reservation deadline is April 15, 1975.

Thought For Food

Amish Raisin Pie
(Roseine Boi)

Combine 1¾ cups milk and 3 separated eggs in small saucepan and blend Cook, stirring constantly until mixture comes to a boil Remove, stir in 1 teaspoon pure vanilla extract and ½ teaspoon ground allspice Fold in 1½ cups golden seedless raisins, cool Turn mixture into pastry shell; chill thoroughly Meanwhile in a small mixing bowl beat egg whites until soft peaks form Gradually add six tablespoons sugar, beating until stiff but not dry Spoon meringue over 1 package (3 to 3⅝ oz) vanilla flavor pudding and pie filling mix, being sure meringue touches edge of crust Bake in a preheated hot oven — 450°F-four to five minutes or until meringue is lightly browned Result — a nine inch delight!

Recipe Exchange . . .

Home on the Range

We are still waiting to receive some recipes that were used during the Revolutionary War period or in the 1700's. If you have any recipes that fit into the catagory, please send them along to us.

Next week will be Valentine's Day and although most cooks are watching their pennies while creating dishes for their families, why not try making a special dessert for the event by using cherry or strawberry flavored gelatine? Most gelatine desserts cost from only 8-16 cents a serving depending on ingredients.

For a starter why not try the following recipe chosen especially for our readers.

xxx

Strawberry Special

1 large package strawberry or strawberry-banana gelatine
1 small bowl non-dairy whipped topping
1 small package frozen strawberries

Defrost strawberries allowing them to stand at room temperature for a few minutes. Prepare gelatine and let it thicken to egg white consistency.

Combine whipped topping and ¾ of the (drained) strawberries in a bowl. Stir to mix with rotary beater or by hand until mixed well.

Remove 1½ cups of gelatine mixture from the pan. Pour whipped topping mixture over the bottom half of gelatine and pour remaining gelatine over the topping carefully. Arrange remaining strawberries on the top along with coconut or small marshmallows. Chill and serve.

xxx

Cinnamon Buns

1 tablespoon yeast
¼ cup melted lard
¾ quart warm milk
1½ cups granulated sugar
2 tablespoons salt
2 eggs

Add enough flour to make a nice dough. Let rise then knead and let rise again. Roll out about ½ inch thick, spread with margarine and sprinkle with granulated sugar, brown sugar and cinnamon on top. Then roll up and cut in about ½ inch slices. Put in pans to rise before baking.

Esther Brubaker
Stevens

xxx

Chicken Noodle Casserole

8 ounce package noodles
2 cans mushroom soup
2 cups milk
2 teaspoons salt
⅛ teaspoon pepper
2 tablespoons chopped onion
2 cups frozen peas and carrots
1½ cups chopped chicken

Cook noodles in chicken broth. Combine soup, salt, pepper and milk. Add remaining ingredients. Pour into casserole. Bake 45 minutes at 350 degrees.

Susan Burkholder
Lebanon

xxx

Cherry Angle Food Cake

Sift together three times:
1 cup cake flour
⅞ cup granulated sugar
¼ cup cherry flavored jello

Measure in a large bowl:
1½ cup egg whites
1½ teaspoon cream of tartar
¼ teaspoon salt
1½ teaspoon vanilla
½ teaspoon almond extract

Beat with a rotary beater until stiff. Gradually add ¾ cup white sugar, 2 tablespoons at a time. Beat 10 minutes after each addition.

Sift flour, sugar mixture, gradually over egg white mixture folding in with a spoon. Bake in an ungreased tube pan at 350 degrees until cake tests done.

Mrs. Elam Martin
New Holland

xxx

Beef Chowder

2 pounds ground beef
1 cup chopped celery
½ cup chopped onion
one-third cup chopped green pepper
2 - 10 ounce cans cream of celery soup
1 quart canned tomatoes cut up
1 quart whole kernel corn
salt to taste

Cook beef, celery, onion and green peppers till soft. Add remaining ingredients and simmer one hour.

Mrs. Frank Hurst
East Earl

xxx

Walnut Custard Pies

1 cup brown sugar
½ cup molasses
½ cup walnuts
2 cups water
4 eggs
1 teaspoon baking powder
3 tablespoons flour

Combine ingredients and bake.

Ruth Hoover
East Earl

xxx

Fried String Beans

Boil string beans until tender, then drain water off and fry till brown. Serve with ketchup or applesauce.

Nora Holt
New Holland

xxx

Veal Cutlets

Veal cutlets are thin boneless slices cut from the round (leg) of veal (animals less than three months old)

Farm Women Calendar

Saturday, February 8
Farm Women Society 25 meeting at 1:30 p.m.

Wednesday, February 12
Farm Women Society 14 meeting at the Ambassador for Christ, Inc. in Paradise.

Thursday, February 13
Farm Women Society 21 meeting at Mrs. Howard Steinberg's in Quarryville - program artificial fruit making.
Farm Women Society 13 meeting at 7:30 p.m. - Valentine Party.
Farm Women Society 9 meeting at 12:30 p.m.

Saturday, February 15
Farm Women Society 12 meeting at 1:00 p.m. at the home of Mildred Kindig - craft program.
Farm Women Society 5 Berks County - Hoe Down at the Stouchsburg Fire Hall from 8:00 p.m. - 11:00 p.m.
Farm Women Society 18 meeting at entertain Society 4 at the Farm and Home Center beginning at 12:30 p.m.

Please Note

We are still waiting to receive booklets from many of the Farm Women Societies. If your Society has not sent a booklet to us we would appreciate them as it is a help to us in publicizing meeting dates. We invite Societies from York, Chester, Lebanon and Berks to also send along program booklets.

Farm Women Societies

Society 5

Society of Farm Women 5 recently met at the home of Mrs. Goldie Groff. Joyce Hibsman gave an arm-chair view of 7 countries in Europe with a slide presentation.

On February 19 at 5:00 p.m. the Club will meet at St. Paul's United Church of Christ's Parking Lot in Manheim. From there the group will travel to the Hershey Motor Lodge, for a meal and then on to the arena to see an ice hockey game. Tickets are $9.50 each. Please leave Mrs. Mervin Peifer know if you are going by February 8.

The February 22 meeting will be at the home of Mrs. Herbert B. Frey in Manheim. Bring home-made or home-crafted items to be auctioned off at this Bring and Brag Sale.

Society 10

Farm Women Society 10 met recently at the home of Marion Fox in Lancaster. Eliza Esbenshade served as co-hostess for the meeting.

Gertrude Habecker, presided at the business meeting with Iva Buckwalter giving devotions.

Roll call was given by announcing member's projects for February. In memory of three members who are deceased, Ada August, Bertha Landis and Minnie Lausch, the society decided to give a library book to the church of their membership.

Grace Esbenshade wore the gift she received from the State Farm Women organization which was a replica of a twenty dollar gold piece on a chain. The gifts are given to those farm women over 90 years of age.

A bus trip is scheduled to go to the Philadelphia Flower Show on Wednesday, March 12th. Interested members should contact Evelyn Neff for details.

The next meeting will be held March 1 at the Holiday Inn on the Lititz Pike.

Society 24

The Society of Farm Women 24 met on January 29, 1975, at the home of Mrs. George Ebersole. Twenty five women were present responding to roll call with a blizzard experience.

The business meeting was conducted by Mrs. Jack Golston and the program for the evening was the annual reading of the state by-laws, and state convention reports given by Mrs. Chris Lantz and Mrs. Roy Witmer.

The project for the evening was to tear and roll bandages from worn sheets, for overseas use. A silent auction was held with the proceeds going to the treasury.

Delicious refreshments were served by the acting hostess Mrs. Leah Bushong.

Society 29

Farm Women Society 29 met Jan. 23 at the home of Mrs. Stanley Newcomer. Sixteen members responded to roll call by naming a safety hint. Pres. Mrs. Gerald Erb presided at the business meeting and also gave a report from State Convention. Mrs. John H. Rose and Mrs. Marlin Myer were installed as new members. Next month, Feb. 15th, the group will have a progressive dinner with the husbands.

Thougnt For Food

Hungry Boy's Cheese Soup

- 1 Package (10 oz.) frozen mixed vegetables
- 2 teaspoons celery seed
- 1 teaspoon instant minced onion
- 1 can (10¾ oz.) cheddar cheese soup

Philadelphia Flower Show Set March 9-16th

The largest flower show on the East Coast–the annual Philadelphia Flower and Garden Show–will be held this year from March 9 through March 16 at the Philadelphia Civic Center.

The show, sponsored and managed by the Pennsylvania Horticultural Society, will feature 78 major exhibits and 168 competitive horticulture and arrangement classes. Major exhibitors include nurseries, commercial greenhouses, florists, plant societies, and educational institutions. Featured this year will be an 1,000 square foot replica of Old Swego Swamp in the New Jersey pine barrens; a 1,200 square foot floral clock which will tell the time; a 5,600 square foot, four-season vegetable garden; and an 1,800 square foot scene of native Pennsylvania wildflowers, mosses, and ferns. There will be many smaller exhibits, also, including: African violets, daffodils, orchids, rock garden plants, bonsai, and indoor garden plants.

The 168 competitive classes will include: forced bulb arrangements, plants in hanging containers, terrariums, espaliers, terrace and room decorations, pressed plant material, and professional displays of cut roses and carnations.

The central feature of the 1975 Show will be an 8,000 square foot walk-through park with waterfalls, streams, and a play area for children. The park will be planted with 6,500 tulips; 3,500 hyacinths; 6,000 daffodils; and 400 rose and azalea bushes.

As a special feature of the 1975 Show visitors will be able to consult a computer for rapid answers to their horticultural questions. And 20,000 visitors will plant acorns and take them home with instructions for transplanting the trees into their yards.

This year the Show will have 190,000 square feet of floor space, more than ever before, to accomodate more exhibits and the 150,000 people who are expected to attend.

The Flower Show's sponsor, the Pennsylvania Horticultural Society, is a non-profit educational institution whose purpose is to distribute information about, and promote an interest in horticulture. The Society's headquarters are at 325 Walnut Street, Philadelphia.

Parking for the Flower Show is available at the Philadelphia Civic Center, located at 34th Street and Civic Center Boulevard. But visitors are urged to use public transportation, which is available to the Civic Center from center city Philadelphia and from the 30th Street Station of the Penn Central Railroad.

Hours of the Flower Show are: Sunday, March 9–noon to 9:30 p.m.; Monday, March 10 through Saturday, March 15–10 a.m. to 9:30 p.m.; and Sunday, March 16–noon to 7 p.m. The best (least crowded) times to visit the show are in the late afternoon and evening hours. Meals may be purchased in the Civic Center or at several nearby restaurants.

AMA Diet Positions

Educating people to know what nutrients they need to be healthy, and what foods will give them those nutrients, are the two primary challenges facing nutritionists today.

The American Medical Association's Council on Foods and Nutrition officially recognized this fact a few years ago when it issued a position statement that read:

"Foods are grouped into the Basic Four: (1) milk and milk products; (2) meat, fish and poultry with nuts and legumes as alternates; (3) fruits and vegetables; and (4) breads and cereals. A wise selection of foods from each group, as recommended will provide an adequate diet."

THE STATEMENT is regarded as important enough to be re-issued recently, in company with four other AMA statements relating to nutrition.

Regarding weight control, AMA says: "There is a significant and increasingly publicized problem with a certain minority of physicians who limit their practice to the treatment of obesity." AMA warns against the use of digitalis, prolonged use of diuretics (they increase body water excretion), toxic doses of thyroid, and other potentially dangerous therapeutic measures as "having no rational basis in the treatment of obesity."

AMA specifically urges all physicians to "limit their use of amphetamines and other stimulant drugs . . ."

CONCERNING low-carbohydrate diets, AMA stated in part that variations of this diet have been promoted for years - the most recent effort being that contained in the "Dr. Atkins' Diet Revolution." The diet is neither new nor revolutionary and the rationale advanced for it "is, for the most part, without scientific merit." AMA also worries about people on such a diet possibly suffering an elevation of levels of fats in the blood.

The Zen Macrobiotic diet, says AMA, is "one of the most dangerous dietary regimens, posing not only serious hazards to health but even to life itself." Some followers of the most rigid diet have died. Others have incurred serious nutritional deficiencies such as scurvy, anemia, emaciation and loss of kidney function, and drastic drops in the body's stores of protein and calcium.

REGARDING hunger, the AMA position is that "in society that can afford to abolish it (hunger) is morally and economically indefensible." And malnutrition "may be just as damaging to the individual." Physicians are urged at the local level to involve themselves in "community affairs that pertain to the resolution of hunger and malnutrition."

Lamb

Lamb is traditionally served well done in America-cooked to an internal temperature of 170 F. as measured by a roast meat thermometer Many diners, now, however, are following the lead of gourmet cooks who prefer their lamb medium-160 F. or rare-140 F

...and we're slashing our loan rates, too.

Buy a new car in February and make it easier on every month's budget.

Making payments on a new car can take quite a bite out of your monthly budget. We know that. So we've introduced a special program to make car-buying easier on your pocketbook.

Purchase a new car between February 1 and February 28, 1975, and get specially reduced interest rates on an automobile loan. Only from Farmers First. Add this savings to the rebates now offered by many new car manufacturers, and we think you'll agree . . . there couldn't be a better time to buy a new car.

Just ask about special reduction on interest rates at any Farmers First office or any of these participating new car dealers.

Tired of poinsettias, holly and mistletoe? Try Amaryllis.

What's an Amaryllis? It's a red flowering plant discovered growing wild in the heat of summer in South Africa around the turn of the 17th century. Fascinated by their find, botanists brought it back to England.

The following winter—when it was once again blossom time in South Africa—the bulb surprised Londoners by bursting into bloom on Christmas Day. That first December bloom marked the beginning of a new tradition—Amaryllis at Christmas.

Today, most Amaryllis plants are bred in Holland, where they have been hybridized over the years. Because of the expense of hybridization, Amaryllis plants once cost a pretty penny.

Currently, an average-sized plant, between 18" and 36" high with four or more large flowers, costs between $5 and $7 a bulb.

Interest in the Amaryllis plant in the U.S. has grown tremendously. Import figures show that in 1971 we bought 550,000 Amaryllis bulbs from Holland. This past year, the U.S. imported 1,100,000.

Bulb importers attribute the booming trade to the fact that the Amaryllis is, in their words, a "living plant." Once the bulb is planted, you may see growth within 24 hours. The typical Amaryllis is ready to bloom in 4-6 weeks. And, unlike the poinsettia—the perennial Christmas favorite—the Amaryllis blooms much longer, often from December through April.

The Amaryllis can also be made to flower year after year. When the Amaryllis no longer blooms, just cut it back and bury it outdoors until the following fall. When brought back indoors, the Amaryllis will bloom again for years to come.

[N.B. fans of the poinsettia. Your traditional favorite continues to make a strong showing in the trade ledgers, with imports now running more than 9 million plants a year.]

Chickies Creek Project Study Is Underway

State Conservationist Benny Martin, Soil Conservation Service, announced that the first phase study of Chickies Creek Watershed, Lancaster County, has been completed.

The work, completed by the consulting firm of Michael Baker, Jr., Camp Hill, includes a study of the land, water, geologic, archeological, social, cultural, and economic conditions throughout the watershed.

Martin said the Phase 1 study is part of an evaluation of the watershed to determine whether a watershed protection and flood prevention project is feasible under PL-566.

The consulting firm is now studying Phase 2 which includes surveys of flood damages and flood levels in the watershed.

The remaining three phases of the study will deal with engineering, hydrological, and biological conditions. All five phases are expected to be completed by June of this year, Martin reported.

The watershed project for Chickies Creek is sponsored by the Lancaster County Conservation District and Manheim Borough.

The major flood damage center in the 21,760-acre watershed is Manheim. During Hurricane Agnes, the borough was severely damaged by flood water. Industry, homes, and commercial establishments were severely flooded.

A SIZE FOR YOUR FEEDLOT

Choose from 130 to 320 cubic foot capacity

Five Gehl models to select from. Three new Gehl Mixer-Feeders carry and completely mix 170, 280, or 320 cubic feet of feed. Triple-augers handle all ingredients. Because the chain is pulled from the outer chute, these units unload as much as ½ easier. Rugged construction and simple design keeps 'em going longer. Electronic scales available. Check also, Gehl Blender-Feeders with 130 and 190 cubic foot capacity.

Deer Kill Report

More than 118,000 deer kill report cards have been returned to the Game Commission by hunters who were successful during the fall and winter whitetail seasons.

This year the report card for deer and turkey kills was not a part of the hunting license, as in the past, and some hunters may have overlooked filing the reports.

The report cards are most important to the state's wildlife managers, who depend on the information to keep abreast of changes in the deer heards and turkey flocks throughout the commonwealth.

Those who failed to file the reports on turkey or deer taken during the most recent hunting seasons are urged to do so immediately.

Improper Diets

It has been estimated that improper diets cost the nation 30 billion dollars annually in medical bills for such things as obesity diabetes, dental decay and alcoholism

ORGANIC LIVING

By

Robert Rodale

Man Must Change To Survive
By Robert Rodale

Everybody talks about the weather these days - and does *something* about it, too.

What do they do? They avoid the weather, that's what.

In summer, people dash from air-conditioned cars into climate-controlled homes. And they spend their days inside window-less, fresh-airless work places where ambient air passes through energy-hungry refrigeration coils.

In wintertime, people have the same preoccupation with comfort. Americans shuddle in warm homes, dash for idling cars and drive to stuffy offices until it's time to return to their sealed-up homes. The most affluent avoid the challenge of winter entirely by skipping off to the subtropics, so their bodies never have to adjust to the season's weather variations at all.

Believe it or not, there are benefits to change. In fact, there may be one extremely valuable reason why change in a person's life is good.

Change, say some scientists, enables the body to keep adapting to an environment that is constantly shifting, and that adaptation process is healthful.

Consider what happened to the dinosaur. When it roamed the earth millions of years ago, it's territory was tropical. But then, the portion of the earth the dinosaur called home changed to a more variable climate.

The dinosaur was unable to adapt to that change, and consequently, is nothing more than a pile of old bones in a dusty museum today.

I'm not suggesting that man will go the way of the dinosaur. I find it hard to believe some 25th century version of Walt Disney will be showing a bunch of non-humans how man really lived. But we shouldn't pamper ourselves too much.

Dr. Van Rensselaer Potter of the University of Wisconsin Medical School believes that man needs to keep his ability to adapt sharply tuned. Let it go to waste or go unused, and when the next change comes along, man might not be able to make it.

Potter outlined some of these theories in a book, "Bioethics, Bridge to the Future," which should give anyone reading it reason to pause. Instead of seeking some unchanging, constant way of life, he says, man should run for change, not from it, and welcome it.

I think we've lost sight of some very basic values by our fight to avoid change. How can a person even think of welcoming the first warm day of early spring if he hasn't experienced winter?

How can someone who's never known the pleasure of working outside under a hot sun appreciate the value of a cool drink of fresh spring water?

These are gut feelings about the seasons and about change. But there is a practical side. Imagine for a moment - and for some this isn't hard - that after several years of life in the artificial atmosphere of cooled air, the system breaks down. Without warning. Suddenly you're stuck in the real world.

At first, it's unbearable. But gradually, your body adjusts and you find yourself becoming more comfortable. You'll probably find that when the air conditioning is turned on again, you're actually cold.

The seasons are to be enjoyed. In wintertime, dress warmly and get outside. Enjoy the brisk cold outdoors. Let your lungs have a vacation from the stale, stagnant air of an apartment or a home that is too hot.

Summertime can be enjoyed, too. So can spring and fall.

If any environment is an ideal one, it's the one that happens to be onstage at any given time. Live the seasons. Live for the changes. Don't fight change. You'll survive easier that way.

(Editor's Note: The opinions appearing in "Organic Living" are those of its author, Robert Rodale, an independent columnist. Rodale's comments do not necessarily reflect the thinking of the Lancaster Farming editor or anyone else on the Lancaster Farming staff.)

Turfgrass Fertilizer Seen Adequate

Fertilizer supplies for home lawns, golf courses, and parks should be adequate this spring but higher in price than last year, says a faculty member of the College of Agriculture at The Pennsylvania State University. Dr. Donald V. Waddington studied the situation and reported his findings at the 45th Michigan Turfgrass Conference held recently in East Lansing, Michigan.

A check of typical turfgrass fertilizers showed price increases of 60 to 67 percent since last spring and 29 to 35 percent increase since last July, he stated.

As an example, a 10-6-4 fertilizer with 25 percent slow-release nitrogen increased from $130 per ton in the spring of 1974 to $162 in July, 1974, and to $212 in January of this year. Obviously, rising costs for materials and manufacturing are passed along to buyers.

Describing increased costs for two special slow-release nitrogen fertilizers, ureaform and IBDU, Dr. Waddington said ureaform prices have increased by about 60 percent in the last two years. Costs for IBDU have doubled in that time. In studying the fertilizer market, Dr. Waddington contacted representatives of major turfgrass fertilizer manufacturers and some of the largest distributors in Pennsylvania. He is associate professor of soil science at Penn State.

According to one manufacturer, the homeowner who paid about $8.80 in 1972 to fertilize an average lawn of 8,000 square feet will be faced with $14.40 for one application of the same material in 1975. Two or three applications a season are generally recommended. Thus, some fertilizer suppliers expect a decline in buying by homeowners.

People who buy in large quantities, such as superintendents of golf courses and parks, may not always get the exact fertilizer grade or ratio they want and deliveries may be delayed, Dr. Waddington observed. If delivery is delayed, be prepared to pay the price asked at delivery time rather than at ordering time, he noted.

The Penn State turfgrass scientist suggested several ways to cut fertilizer costs. Quick-release or soluble fertilizers furnish nitrogen at lower cost than the slow-release types. If a switch to solubles is made, adjust the rate and timing of use to avoid fertilizer burn or overstimulation of growth from quick-release fertilizers.

In buying different fertilizer grades with the same ratio of nitrogen, phosphorus, and potash, a higher analysis such as 16-8-8 is normally a better buy than the same ratio at 10-5-5. This is due to a lower cost per unit of plant food, less material for handling and storage, and lower shipping costs.

Dry products are less costly than liquid fertilizers, Dr. Waddington pointed out. Blends may be lower priced than granular or pelleted fertilizers. However, separation of materials due to size or density differences is a problem with some blends. Higher costs for granular or pelleted fertilizers may be justified, he claimed, to obtain balanced distribution of nutrients with spinner-type spreaders.

Homeowners should look for discounts during early season sales campaigns or late in the season. Above all, have the soil tested to determine the need for nutrients.

Turf professionals using large amounts of fertilizer should continue buying bulk supplies, where savings are generally available. Some suppliers will deliver in portable bins if storage space is not available.

It's Here!

Lewisburg Farmer Wins Corn Award

Robert B. Hubler of Lewisburg, with a yield of 158.6 bushels per acre, has been named the 1974 Funk's-G Project: 200 winner for the state of Pennsylvania. His authenticated yield was made with Funk's G-4465. Hubler will receive an engraved plaque in recognition of his outstanding yield.

Project: 200, America's largest high yield corn growing program, was designed to challenge growers to increase corn yields for greater productivity and profit. During the past four years more than 20,000 growers have submitted Project: 200 yields. The program is sponsored by The Producers of Funk's G-Hybrids.

Hubler's state championship yield of 158.6 bushels per acre was machine harvested from 2.1 acres. In preparing the land for planting he spring plowed and disked.

Hubler's fertility program consisted of 213 pounds of nitrogen, 103 pounds of phosphate and 58 pounds of potash per acre applied as preplant, starter and sidedress fertilizer.

Hubler's contest corn was planted on May 17 in 38-inch rows, at the rate of 21,500 kernels per acre. A combination herbicide and insecticide were used for crop protection.

The Pennsylvania champion harvested his corn on November 26. The moisture content was 24.7 percent. Plant population at harvest was 19,800 per acre.

The qualify for Project:200, participants harvest as shelled corn, a minimum of 2 acres from not less than four adjacent rows running the full length of the field. Information on the area harvested, grain weight and moisture content is verified by a disinterested witness. Final yields are reported on the basis of No. 2 corn at 15.5 percent moisture.

The 1974 National Winner of the Funk's-G Project:200 program is the Peter Cook Estate of Rio Vista, California. They harvested a yield of 282.2 bushels per acre of Funk's G-4737.

Regional Project:200 winners are Jacob J. Walter, Ovid, Colorado, with 258.5 bushels per acre using Funk's G-4444; Lloyd A. Johnson, Houston, Minnesota, 233.8 bushels per acre from Funk's G-4444; Ashby Farms, Fairmont, Nebraska, 240.5 bushels per acre with Funk's G-4444 and Arthur M. Marlowe, Loris, South Carolina, 225.3 bushels per acre from Funk's G-5757.

Each Project:200 participant receives special recognition from The Producers of Funk's G-Hybrids.

Information gained from the 1974 Project:200 program is being summarized by Funk Seeds International. This information will be made available to all corn growers. With this agronomic information, producers can compare their growing methods with those used by other top corn growers.

"Let's Keep Growing" Agricultural Theme

"Maryland Agriculture - Let's Keep Growing" is the official slogan for the 1975 Maryland Agriculture Week being observed February 2 through 8.

Selected from over 200 entries, the slogan was submitted by Mrs. Mary C. Godfrey of Sudlersville, Queen Anne's County, who, with her husband George, knows well of what she speaks.

The Godfreys are everyday growers of Maryland agriculture as they farm four tracts totaling about 650 rich Eastern Shore acres. They are primarily contract vegetable growers raising such crops as lima beans, peas, snap beans, and tomatoes. They also have about 150 acres in asparagus.

Besides farming, they are active in 4-H work and serve as Queen Anne's horticultural judging leaders. Mrs. Godfrey, the mother of two boys and two girls, when not busy writing slogans, helps her husband run their farm. She sumbitted several other slogans in this year's contest, two of them being among the top six considered by the Ag Week Committee's judges: "There's a Farmer Behind Every Forkful," and "Food is Fuel For Living."

The Godfreys will be special guests at the February 6 annual Maryland Agricultural Banquet honoring members of the General Assembly. Ag Week chairman Robert Rawlings said, "This year's slogan contest brought out many good ideas and means to get people to think about agriculture's vital role in Maryland and the nation. The Committee joins me in sincere thanks to all who contributed their thoughts.

Also on the program for 1975's Ag Week are agricultural exhibits at regional shopping malls. Security Square Mall will host the exhibits the week of February 3-8; Salisbury Mall will take over on the 19 through 22, and Montgomery Mall will be the scene the week of February 24 through March 1. The Ag Week exhibits are coordinated by Roy Porter, Extension Service.

Holstein's Have Year of Production

For Holstein-Friesian Association of America and the Holstein breed in the United States, 1974 could well be called the "Production" year. In May, the first 2,000-pound butterfat record was made; in December, the first 50,000-pound milk record was produced and also in December, the lifetime milk production record was broken.

Breezewood Patsy Bar Pontiac 6174402, a Registered Holstein owned by Gelbke Brothers, Vienna, Ohio, produced 2,191 pounds of butterfat, the first cow ever to produce more than a ton of butterfat in a year. Her milk record of 45,270 pounds was also an all-time record.

"Pontiac's" milk record was broken in December when Mowry Prince Corinne 6062169, a registered Holstein cow owned by Clarence and Kenneth Mowry, Roaring Spring, Pennsylvania, completed a year's record of 50,759 pounds of milk. That was the first 50,000-pound milk record ever produced by any cow of any breed anywhere.

The third production mark broken during the year was the all-time lifetime milk production total of College Ormsby Burke who produced 334,292 pounds of milk. In December, Or-Win Masterpiece Riva 4624699, a registered Holstein cow owned by Willard and Gary Behm, Adrian, Michigan, surpassed that mark with a lifetime total of 335,010 pounds. And she's still producing!

Even though production stood out as the real eye-popper for the Holstein breed in 1974, other areas did very well too.

The Descriptive Type Classification Program set all-time records for herds classified, 4,838; animals offered 219,209, and animals receiving a new breakdown 175,409. Records were also set in the number of herds and animals offered for classification in a single classification district. In fact, the record for herds was broken three times and the record for animals twice.

The second highest total of Holsteins were registered 291,789, including 6,071 over two years old that were registered under a moratorium declared by the HFAA Board of Directors. The total Holstein registrations accounted for 76.1 percent of the 379,401 animals registered by the five major dairy breeds in the United States. An additional 155,318 Holsteins were transferred to new owners.

On the membership side, 2,130 persons became new members; 990 renewed their memberships and 1,485 youngsters between 9 and 21 years of age became new Junior Members of HFAA.

At year's end, 115,348 cows in 1,969 herds were enrolled on DHIR Official Production Test. The Performance Records Department also reported that 37,967 official performance pedigrees were issued, the second highest total ever. Seven cows became new first place National Production Leaders and two also became new 300,000-pound lifetime milk producers bringing the total to six, three of which are living.

A new Association program, the Participating Herd Agreement, began in 1974 with 234 Holstein herds totalling 16,717 cows in 32 states being approved as participating herds and agreeing to help sample qualified sires of the Holstein Sire Development Service or sampling programs of semen producing businesses.

For the Association's subsidiary, Holstein-Friesian Services, Inc., it was also a very good year. In International Marketing, 9,048 animals were sold to 23 countries through HFS, Inc. Of that total, 6,443 were Holsteins. The other breeds included Hereford, Angus, Santa Gertrudis, Simmental, Brown Swiss, Jersey and Guernsey. The country purchasing the most livestock thru HFS, Inc. was Hungary with a total of 5,128 animals, including Holsteins and Herefords.

The Genetic Evaluation and Management Service, GEM, a breeding and management consultation service, showed excellent gains as well with 19,068 animals in 310 herds being evaluated by 20 consultants around the country.

The Holstein Sire Development Service, in its second year of service, showed a remarkable total of 212 bulls being enrolled and 116 applications which were received. Of the bulls enrolled, 174 were accepted and designated "Qualified" sires by HSDS. To date, 60 Qualified sires have been sold by their owners, both domestically and abroad and 46 qualified sires presently have semen available and are being sampled throughout the country.

Other services being conducted through HFS, Inc. are the sale of the HFS Cow Calendar, a complete herd record keeping system and a service of repair of glass parts of pipeline milking systems through Vitri-Forms, Inc. in Brattleboro, Vermont.

At the Association's Annual Convention in Atlantic City in June, Clifford Bailey, Snohomish, Washington, was elected to his second term as HFAA President; Gordon Newton, Tatum, South Carolina, was re-elected Vice-President; J. A. Fairchild, Berwick, Pennsylvania and Henry Polinder, Lynden, Washington were re-elected to the Board of Directors; Duane Green, Elsie, Michigan and Arnold Cotton, Parker, South Dakota were newly elected to the Board. And Elroy Borgwardt, Valders, Wisconsin was elected to the Board for one year to complete the unexpired term of the late Allen Hetts.

Also at the Convention, a painting of a new "Registered Holstein-Friesian Ideal Young Milking Female" was unveiled. Reproductions of the painting are available from HFAA

1974-truly the "production" year at HFAA and one of the most successful in the 90-year history of Holstein-Friesian Association of America.

Thomasville 4-H Club

The Thomasville 4-H Community Club met recently at the home of Mrs. Harris Horn to make plans for 1975. February and March will be registration for the various projects.

Programs for the year will be based on health, blue forms, demonstrations, tours, karate, films, and various recreation. Rural Life Sunday and Community Services were discussed. The Club will participate in the Hemophilia Drive in March.

Community Club meetings will be held on the fourth Tuesday of the month. The Feb. meeting will be on Feb. 25, 1975 at 7:30 p.m. at the 4-H Center near Bairs.

Treating Water Quality Problem

A lot of people with private water systems have trouble with water quality. There are a number of problems that can exist, but they can all be treated successfully, says Ernest W. Walpole, University of Delaware extension agricultural engineer.

The two basic types of water contamination are (1) bacterial contamination and (2) contamination from mineral or other substances that affect water color, taste and quality.

From a health standpoint, bacterial contamination is the more serious problem. It is most likely to occur with a dug well, less so with a drilled well. If you have a dug well on your property or are considering buying a house supplied by a dug well, you may want to have the water tested. This service is provided free in Delaware by your county Office of Environmental Health, a branch of the State Division of Public Health.

In checking the water quality in a private well, the Office looks for two things — first, the construction of the well itself; secondly, the purity of the water from a bacterial standpoint. Dug wells are particularly susceptible to contamination from surface water runoff and the entrance of foreign objects which can pollute. If the construction of a well is faulty, so that contamination is a strong likelihood, this condition will need to be corrected before a water quality check is made by a state inspector.

What are the characteristics of a good dug well? It should be at least 20 feet deep and its walls should be solid down to 10 feet. The well should be grouted from the outside. The top of the well should be at least 18 inches above the ground and it should have a tight-fitting lid.

Location of either a dug or drilled well in reference to your sewage disposal system is also critical. The well should be upgrade at least 50 feet from a septic tank, and at least 100 feet from the absorption bed in order to prevent contamination from waste water.

Contamination of water from mineral or other substances — though less serious in terms of your health — can be quite inconvenient. There are a number of impurities that can be present in your water supply. They include iron contamination, acid water, hard water and dirt sedimentation.

Brown stains in the toilet bowl of a house you are considering buying are an indication of either iron mineral or iron bacteria contamination. Iron bacteria are fairly common in water around Delaware, Maryland and New Jersey, says Walpole. They feed on the iron in the water and look like a chocolate-colored jelly in pipes.

Water with a high pH level is another fairly common problem in this area. The main effect of acid water will be a metallic taste. Hard water is caused by calcium from limestone.

All these conditions can be treated by chemical additives or by filtering, says Walpole. It is best to get help from a water treatment specialist in dealing with them. In fact, get a couple of analyses and suggested remedies before hiring anyone to do the job.

Just about all the problem water conditions you are likely to find in this area can be corrected, assures the engineer. So there's no need to put up with water that stains your clothing and plumbing, that tastes bad or is otherwise unsatisfactory.

Elvin Hess

Hess Completes Course

Elvin Hess of Strasburg, Pennsylvania, has successfully completed the Genetic Mating Service (GMS) course, according to an announcement by Richard G. Smith, Manager, Genetic Mating Service. GMS, a program founded by American Breeders Service, a division of W. R. Grace & Co., is the evaluation of strengths and weaknesses on an individual cow basis, combined with production information under a uniform coding system. Data is fed into a computer by ABS. The computer will make up to a maximum of 2000 decisions for the best sire recommendation for each individual cow evaluated.

Hess, a native of Pennsylvania, was reared on a dairy farm and was a graduate of West Lampeter High School. He has been a leader in the state for the Holstein breed. He served as Pennsylvania State Holstein President and was a delegate to the National Convention of the Holstein-Friesian Association.

Manor Dairy Club

Members of the Manor 4-H Dairy Club met recently at the home of Loretta Doss of Oxford, Pa. Jim Stanton, president, presided at the meeting with 13 members in attendance.

Stanton gave a report on his trip to Columbus, Ohio, with the State's 4-H Judging Team.

New officers elected at the meeting were: Eddie Henley, president; Jeannett Kauffman, vice-president; Debbie Reynolds, secretary and William Henley, news reporter, with Linda Rohrer and Loretta Doss as song and game leaders

Lancaster Co. FFA Project Book Winners

Lancaster County vo-ag students submitted their project books to the county's vo-ag teachers for judging last Thursday, January 30. The teachers judged the books on the basis of neatness and completeness. The judges gave the most consideration, though, to the production efficiency as recorded in the project book. They looked for high profit per animal or per acre first in selecting the winning project books.

The winners in each category, the medals won, and their schools are listed below:

Single Enterprise

Gerald Keller, Gold, Manheim Central; John Mylin, Silver, Penn Manor; Jim Risser, Silver, Penn Manor; Tim Good, Bronze, Manheim Central.

2 Enterprise

Robert Burkholder, Gold, Penn Manor; Tom Horst, Silver, Ephrata; Thomas Wentzel, Silver, New Holland; Dean Hershey, Bronze, Manheim Central; Gary Keefer, Bronze, Solanco.

3 Enterprise

Marshall Trimble, Gold, Solanco; Gary Eberly, Silver, Ephrata; Clifford Martin, Silver, Ephrata; Earl Geib, Silver, Manheim Central; Jim Bucher, Bronze, Solanco; Dave Gerhart, Bronze, Solanco; Dave White, Bronze, Manheim Central.

4 Enterprise

Tom Galbreath, Gold, Solanco; John Harnish, Gold, Lampeter-Strasburg; Barry Wissler, Silver, Ephrata; Richard Mellinger, Silver, Lampeter-Strasburg; Dwight Houser, Bronze, Lampeter-Strasburg; Rick Burkholder, Bronze, Penn Manor; Richard Groff, Bronze, New Holland.

5 Enterprise

LaVern Martin, Gold, New Holland; Bob Buckwalter, Gold, Penn Manor; Derrill Nolt, Silver, New Holland; John Weiler, Silver, Ephrata; Ron Forrey, Silver, Elizabethtown; Jay Oberholtzer, Bronze, Ephrata; Kerry Boyd, Bronze, Ephrata; Barry Kreider, Bronze, Pequea Valley.

6 Enterprise

K. Rohrer, Gold, Manheim Central; Ruby Ginder, Gold, Manheim Central; L. Hershey, Silver, Manheim Central; R. Kreider, Silver, Manheim Central; James Rutt, Silver, Elizabethtown; R. Strauss, Bronze, Ephrata; Ron Hunt, Bronze, Penn Manor.

9 Enterprise

Lloyd Hoover, Silver, New Holland.

Work Experience

Dwight Martin, Gold, Elizabethtown; Dave Hanks, Gold, Solanco; Larry Weber, Gold, New Holland; Glenn Hursh, Gold, New Holland; Brian Weber, Gold, Ephrata; Kirk Copenhaver, Silver, Ephrata; Ted Grumbein, Bronze, Solanco; Tom Martin, Bronze, New Holland.

Scrapbook

Manheim Central First; Grassland Environmental Second; Grassland FFA Third; Solanco Fourth.

Welsh captains who wear caps woven of hazel twigs are believed to weather any storm.

Angus Records Set

A record week in performance records was set in December as 4,145 weights were submitted by Angus breeders on the Angus Herd Improvement Records program, reports Lloyd D. Miller, executive secretary of the American Angus Association. Equally important, December became the record month in A.H.I.R. history as more than 17,000 weights were processed.

The week of December 16-20 marked an increase over the previous high week of 3,900 head processed in December of 1973 and pointed out the growing acceptance of performance records in beef cattle improvement, Miller added.

Of the record month total of 17,432 weights there were 15,257 weaning and 2,175 yearling weights recorded in the 12-month, 15-month and 18-month yearling age options. A total of 331 Angus breeders teamed up to submit the records during December.

The A.H.I.R. program, Miller added, is a complete performance program offered free of charge to registered Angus breeders. Breeders enroll their herds and submit weaning and yearling weights and grades on forms obtained from the American Angus Association. The informaion is then processed for cattlemen through the Association's data processing equipment. From this raw data, the cattle are ranked according to their performance and evaluated on a selection work sheet for their breeding value ratio which is an estimate of how these animals will perform based on the performance of the individual, their parents, grandparents and all half brothers and half sisters.

These records, backed by eyeball appraisal give purebred breeders an added tool not only in selecting the high performing individuals and bloodlines in their herds, but also identifying the marginal and poor producing sires and dams. Cattlemen interested in enrolling their herd on A.H.I.R. or simply wanting more details, should write Breed Improvement Department, American Angus Association, 3201 Frederick Blvd., St. Joseph, Missouri 64501.

On the Hill

BY REP. KENT SHELHAMER
Chairman, Agriculture Committee
Pennsylvania House of Representatives

I consider it a privilege to have been appointed Chairman of the House of Representatives Agriculture and Dairy Industries Committee for the 1975-1976 session of the Legislature.

It has already become apparent that this Bicentennial Legislature will be one of the busiest sessions in the history of our Commonwealth, and the large volume of work and deliberation involved in the chairmanship will make it necessary for me to curtail a lot of the informal face-to-face meetings in the field with my friends in the industry. Hence, I hope to be able to keep you informed of Legislation that affects the agriculture industry through the use of this column, and I would like to express my gratitude to the news media at the outset for their cooperation in helping to disseminate information which I feel is important to you.

Last November, I had the unforgettable experience attending the World Food Conference in Rome, where it was revealed that millions of people are starving in all corners of the globe despite technological advances in our industry that have greatly increased production and marketing methods.

It is not that we lack the capacity or the means to satisfy the appetites of a burgeoning world population - it is a sad fact of life that more and more farmers have had to forsake their chosen profession in favor of full-time jobs in factories and industry in order to provide a livelihood for their families.

As a result, there are less farms, less farmers, and as a consequence, a lot less food for the world market. For instance, you might be surprised to learn that in the Commonwealth of Pennsylvania alone, there are 30,000 fewer farms today than there were just 15 years ago!

Imagine . . . we have lost over two and a half million acres of precious farmland in the state since 1960; much of it, I am sure, to sprawling suburban land developments which have swallowed up countless thousands of acres to those "amber waves of grain" we hear about in the song. And many more thousands of acres were lost because of the inability of so many industrious farmers to make a decent profit from the land.

These are trying times for the farmer. He has seen his costs of operation skyrocket in the past two years, and even now he faces the prospect of another healthy increase in the price of fuel, which could impose another worrisome burden and cut even deeper into his dwindling profit picture.

As a farmer-legislator, I am well aware of the impact the agricultural industry has on the state's economy. The industry still occupies well over a third of Pennsylvania's total acreage, and generates over a billion dollars in volume each year. A business of such magnitude deserves consideration, and in my post as Chairman of the Agriculture Committee, I intend to give it my best efforts.

At the present time, even though the legislative session is just a few weeks old, there is a veritable mountain of proposed farm legislation on my desk. As with all proposals of such volume, some of it is good, and some of it is insignificant.

In the days ahead, the Agriculture Committee will sift through these proposals and will draft legislation on those items which we consider vital to the farmer and the Commonwealth. Through this column, I intend to keep you informed on the progress of our proposed legislation.

Naturally, we on the Agriculture Committee don't have all the answers to your problems, but I can assure you that we stand ready to lend an attentive ear to all of your suggestions, and if they have merit, they will receive the sincere recommendation of the Committee.

Don't hesitate to contact my office in Harrisburg whenever you have an idea that might be beneficial to both the agricultural industry and the Commonwealth of Pennsylvania.

PSU Scientists Develop 170 New Crop Varieties

Over 170 varieties of crops, developed by plant breeders at The Pennsylvania State University, have been released to the seed industry in the past 64 years.

Development of such improved varieties is a major goal of the Agricultural Experiment Station at Penn State, according to Dr. Guy W. McKee, secretary of the Experiment Station Seed Committee. He said 1975 is the centennial year for the experiment stations of the land grant universities such as Penn State.

The breeding of new crop varieties has progressed rapidly in recent years, Dr. McKee observed. From 1911 to 1939, 10 varieties were released. This increased to 29 from 1940 to 1949. The number rose to 39 in the period 1950 to 1959, and increased to 45 from 1960 to 1969. From 1970 to the present, the new varieties numbered 49.

The earliest Penn State releases were two spring oat varieties, Patterson and Keyson, put out in 1911. These were very popular in Pennsylvania and adjoining states, Dr. McKee said. Nittany wheat, also known as Pa 44 wheat and released in 1917, was very popular in the regions where soft red winter wheat is grown.

Of 53 hybrid corn varieties released since 1947, 20 were used widely and seed of several varieties are still being produced. Pennscott red clover, a local ecotype developed in Lancaster County, is widely used over the northern portions of the United States.

In 1973, 25 corn inbreds incorporating endosperm mutants were released to the seed trade for breeding purposes.

In recent years, Dr. McKee points out, much of the breeding effort on field crops has been devoted to stiffness of straw or stalk and disease resistance as well as yield. This work is reflected in recent varieties such as Pennrad winter barley, Pennfield spring oats, Pennbel 69 and Pennleaf 1 tobaccos, Pennquad buckwheat, ARC alfalfa, and most of Penn State's field corn inbreds.

Four new turfgrass and conservation cover crop varieties, released since 1953, have won widespread acceptance and use. These are Pennfine perennial ryegrass for home lawns and golf courses and playgrounds. Pennlawn creeping red fescue and Penncross creeping bentgrass for fine turf; and Penngift crownvetch for slope stablization. Penngift crownvetch has the distinction of being the first strain of crownvetch to receive a varietal name.

Seed supplies are still being built up for Pennstar Kentucky bluegrass and Lathco flatpea, the latter a new cover crop.

Pennline 1 through 5 snapdragons were selected and released for breeding purposes based on a double petal characteristic. Nittany Lion Red geranium is widely acclaimed as being the first true geranium propagated from seed. Nittany Lion Red won a special commendation for horticultural achievement from All-America Selections.

The University sells no seed, Dr. McKee pointed out. Once released, seed of new varieties is available from seed dealers.

Twenty-seven vegetable varieties have been released over the past 50 years. The earliest was Penn State Earliana tomato in 1928. Stemless Pennred tomato and Stemless Pennorange tomato, both released in 1945, are still used in tomato breeding programs. Of the 10 new varieties of tomato five met widespread acceptance and use.

Pennwonder pepper, Pennsweet muskmelon, Penndale sweet corn, and Pennlewis sweet corn were popular in the home garden. The first two are still used to some extent. The latest developments along this line, both released in 1969, are Pennbell pepper and Penn Beauty eggplant.

Two celery varieties, Penn H-46 and Penncrisp, were developed and released for a specialized use, trenched celery. Penn State Ballhead cabbage, Premier Great Lakes lettuce, and Pennlake lettuce were widely grown over the entire country. Pennlake lettuce is still popular.

Five vegetable varieties won All-America Selections honors. A silver medal went to Penn State Ballhead cabbage and a bronze medal to Premier Great Lakes lettuce, Pennlake lettuce, and Pennsweet muskmelon. The Penn State tomato received special mention honors.

Winners Named For Small Engine Contest

Two Ephrata area youths captured first place in the FFA County Small Gas Engine contest held recently at the Manheim-Central School.

Jay Oberholtzer and Curtis Martin working in a team effort, acquired the most points in the contest to earn first place while Richard Martin and Dean Weiler of Garden Spot finished second. Elizabethtown's team comprised of Jeff Aungst and Merle Gruver placed third just six points behind the Garden Spot team.

Other participants in the contest included: Ray Caldwell and Larry Charles from Penn Manor and Jeff Haldeman and Robert Newcomer from Manheim.

The youths were asked to correct problems in a small engine observing accuracy and skill as well as demonstrating correct safety procedures.

The contest included a written exam along with the actual work and knowledge of the service manual.

Stored Grain Crops Total 92.2 Million Bushels

Stocks of wheat, corn, barley and oats stored in Pennsylvania on January 1, 1975 totaled 92.2 million bushels, up 13 percent from a year earlier, according to the Crop Reporting Service. Of the total, 80.2 million bushels were stored on farms and 12 million bushels off farms.

Wheat totaled 8.7 million bushels, up 35 percent from a year earlier. On-farm stocks totaled 3.2 million bushels compared with 1.5 million a year earlier. Off-farm stocks at 5.6 million bushels were up 46 percent from a year earlier.

Corn in all storage positions on January 1, 1975 totaled 67.6 million bushels, up 8 percent from a year earlier. On-farm stocks at 62.4 million bushels was up 8 percent, while off-farm stock at 5.2 million bushels were 1 percent above January 1, 1974.

Barley stored in all positions on January 1, 1975 totaled 3.5 million bushels, up 24 percent from a year earlier. On-farm stocks were up 21 percent and off-farm stocks were 54 percent above a year earlier.

Oats stored in all positions on January 1, 1975 totaled 12.4 million bushels, up 15 percent from a year earlier. On-farm stocks were up 14 percent, and off-farm stocks were up 33 percent above a year earlier.

Nationally, wheat stocks were 19 percent above a year earlier, but stocks of the four feed grains (corn, oats, barlye and sorghum) were 22 percent below January 1, 1974 holdings.

Corn in all storage positions on January 1, 1975 totaled 3,614 million bushels, down 19 percent from the 4,473 million bushels a year earlier and 25 percent less than January 1, 1973. Farm holdings, at 2,533 million bushels, were down 25 percent from last year and off-farm stocks at 1,080 million bushels, were 3 percent below January 1, 1974. Indicated disappearance during October-December 1974 totaled 1,520 million bushels, compared with 1,882 million in the same quarter a year earlier.

Sorghum grain in storage January 1, 1975 totaled 381 million bushels, 41 percent below a year earlier and 39 percent below the same date in 1973. Farm stocks accounted for 123 million bushels, a decrease of 44 percent from last year and off-farm stocks at 258 million bushels were down 40 percnet. January 1 stocks indicate October-December 1974 disappearance of 308 million bushels, 14 percent below the same period in 1973 and 7 percent below the comparable 1972 period.

Oats stocks on January 1, 1975 totaled 511 million bushels, 20 percent less than a year earlier and 34 percent below January 1, 1973. Farm holdings of 388 million bushels were down 18 percent from a year ago and off-farm stocks were down 24 percent. Indicated disappearance during October-December 1974 was 141 million bushels, 18 percent less than the comparable period in 1973.

Barley stored in all positions on January 1, 1975 totaled 229 million bushels, 29 percent less than a year earlier. Off-farm stocks of 102 million bushels were 10 percent below a year ago and farm stocks, at 127 million bushels were 39 percent smaller. Disappearance during October-December 1974 was 80 million bushels, down 21 percent from the same quarter in 1973.

All wheat in storage on January 1, 1975 totaled 1,100 bushels, 19 percent above a year earlier, but 21 percent less than 2 years ago. Farm stocks totaled 440 million bushels, 21 percent above a year ago, while off-farm stocks at 660 million bushels were up 17 percent. Disappearance from all storage positions from October through December 1974 is indicated at 450 million bushels, compared with 522 million a year earlier.

Durum wheat stocks in all positions on January 1, 1975, totaled 68.4 million bushels, 1 percent above a year earlier. Farm holdings, at 49.2 million bushels, were about the same as a year ago while off-farm grain stocks showed a 4 percent increase, Disappearance during the October-December quarter is indicated at 18.0 million bushels, compared with 21.7 million for the same quarter a year earlier.

Rye stocks in all storage positions on January 1, 1975 totaled 12.0 million bushels, down sharply from the January 1, 1974 level of 21.4 million bushels, and the lowest January 1 stocks since 1953. Off-farm stocks at 5.6 million bushels were less than one-half the year earlier holdings. The 6.4 million bushel holdings on-farm were 18 percent below the 1974 level. Indicated disappearance during October-December 1974, at 8.4 million bushels, was down 45 percent from the 15.4 million bushels in the comparable quarter a year earlier.

Lecturers Chosen For Grange

Appointment of a nine-member lecturer's committee of the Pennsylvania State Grange has been announced by J. Luther Snyder, state master, and Mrs. William Buffington, state lecturer.

Named to the committee are: Mrs. Guy Wilcox, of Warren, Warren County; Arline Cook, Eldred RD, McKean County; Mrs. Roy Adams, Dushore, Sullivan County; Mrs. Arthur Gardner, Hop Bottom, Susquehanna County; Dorothy Weaver, McDonald RD4, Washington County; Mrs. Harry Keith, Entriken RD, Huntingdon County; Mrs. Fred Towsey, Port Royal RD2, Juniata County; Mrs. Robert Mease, Reading RD2, Berks County, and Daryl K. Heasley, rural sociology extension specialist at Pennsylvania State University.

Mrs. Buffington, the state lecturer, resides at Chadds Ford RD1, Chester County. The office of lecturer in the Grange is similar to that of program director.

Chester Extension Personnel Honored

A committee of Chester County 4-Her's arranged a surprise farewell party at the Chester Valley Grange at Devault on Friday evening, January 31, 1975, for Mrs. Carol Rothermel and John Schwartz. The program included skits by 4-H'ers and presentations of gag gifts. An evening of square dancing and a smorgasbord dessert table prepared by 4-H families completed the event.

Preceeding this event, Carol and John were hosted by the Extension Staff at a dinner at the Seven Stars Inn. The staff presented each honored guest with a Penn State Nittany Lion.

Mrs. Rothermel resigned December 31 to assume her responsibilities as the proud new mother of Brent Ryan Rothermel. Mr. Schwartz is transferring to Adams County, February 1 where he will continue his Extension career as Associate County Agent.

A native of Northampton County, Mrs. Rothermel was named to the Chester County Extension Service staff in 1971 as assistant Extension Home Economist.

She prepared for college at Pen Argyl Area High School and received her bachelor of science degree in home economics education from Penn State in 1969. She has done graduate work at Penn State.

Prior to her appointment to the Extension staff she was employed by Downingtown Area School District for two years.

Mrs. Rothermel is a member of Phi Epsilon Omicron, home economics honorary and Alpha Delta Pi, social sorority. She is Secretary-Treasurer of the Mid-Eastern Region Pennsylvania Home Economics Association and a member of American Home Economics Association.

Her ten years experience as a 4-H'er complemented her work in the county youth program. Mrs. Rothermel was chairman of the Regional 4-H Dress Revue Program in 1974.

She recently developed a monthly county newsletter "Textile Topics" which is designed for the individual interested in making and maintaining a clothing wardrobe. This letter will continue bi-monthly under the direction of the County Extension Service.

Her contributions to the county program have been many and varied from providing the leadership for a course to train Nursing Home Administrators to setting up a series of newsletters and workshop for parents of pre-schoolers.

Mr. Schwartz, a native of Adams County, was named to the Chester County Extension Service staff in 1970 as assistant county agent. He was promoted to associate agent last June.

He prepared for college at Gettysburg Area High School and earned a bachelor of science degree from Penn State in 1970, majoring in agricultural education. He is completing requirements for a master of science degree, also at Penn State.

In 1973, Mr. Schwartz was recipient of a national Career Guidance Award from the National Association of County Agricultural Agents and the Sperry-New Holland Company for his educational work to inform young adults of career opportunities in agriculture. In college he was a member of the FFA Chapter, Campus 4-H Club, Agricultural Student Council, and the crops judging team.

He is a member of Gamma Sigma Delta, agricultural honor society; Delta Theta Sigma, social fraternity; and Alpha Tau Alpha, agricultural education honorary fraternity.

His parents, Mr. and Mrs. John W. Schwartz, reside at RD1, Littlestown.

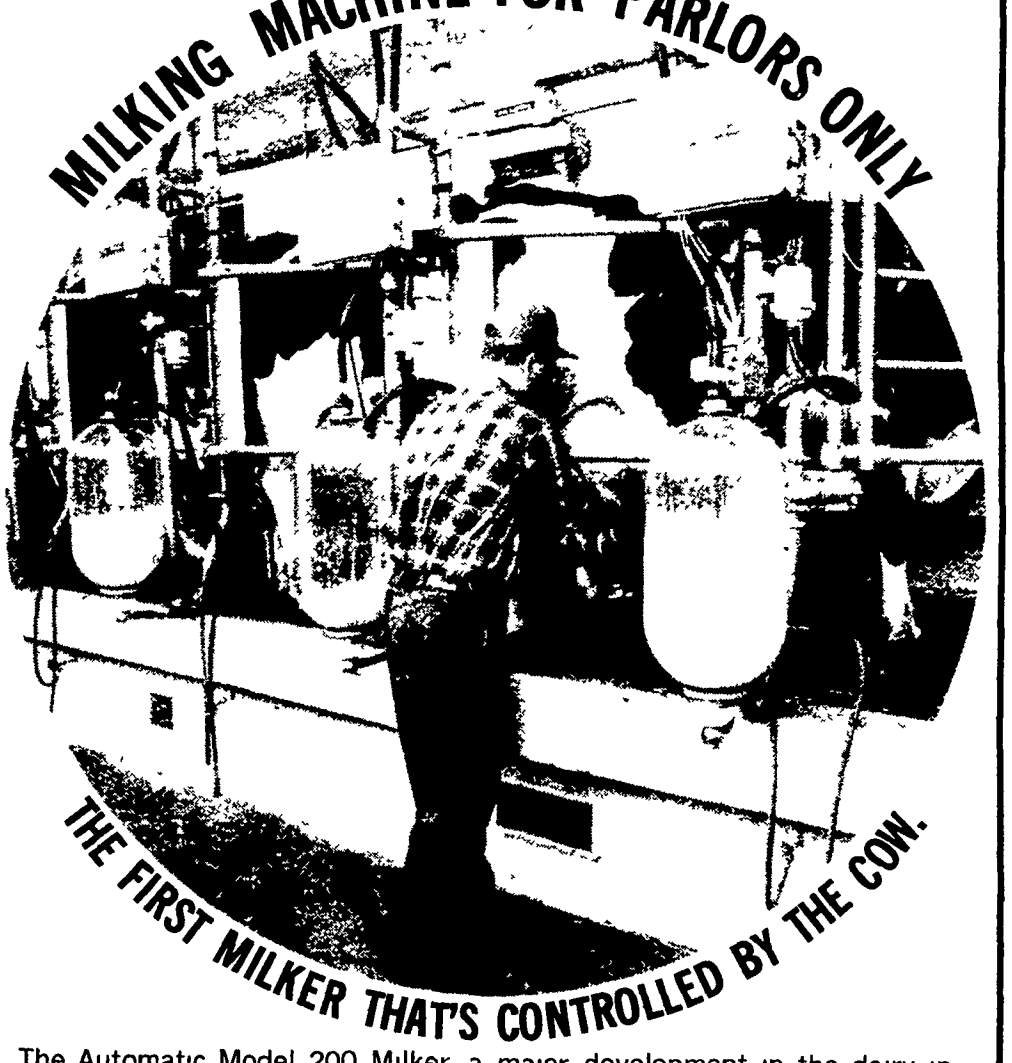
Zero — PIONEER OF FARM BULK MILK COOLERS

DE LAVAL MODEL 200 AUTOMATIC

MILKING MACHINE FOR PARLORS ONLY



THE FIRST MILKER THAT'S CONTROLLED BY THE COW.

The Automatic Model 200 Milker, a major development in the dairy industry, is the first milker that is controlled by the cow. When the cow is ready, the machine begins to milk and an indicator light goes on to tell the operator that it is milking. The Model 200 automatically stops milking when the cow is through. The indicator light will then go out telling the operator that the cow is milked out.

Prevent Seedling Injury

Many home gardeners will soon start their own plants from seed for use in their summer garden. These seeds and resulting seedlings must be grown indoors or in a cold frame for an extended period of time. During this time the young plants are susceptible to a disease called "damping-off" or "seedling blight."

Damping-off is caused by fungi which attack the seed or seedlings either before they come through the soil or after the seedling is up. According to University of Delaware extension plant pathologist, Dr. Robert B. Carroll, there are several fungi involved. They all cause a blight or rot of the lower stem and roots of the plants. Affected plants will often appear to have broken off at or near the soil line. Many different kinds of plants are susceptible to damping-off. Peppers, tomatoes, cabbage, impatiens and coleus are among those most frequently affected.

The best method to control damping-off is through cultural practices that eliminate or inhibit the disease-causing fungi. Start with "clean" soil or planting media—that is, soil that is free of the disease-causing microbes. You can do this by using pre-packaged soil mix. Or, if you prefer a homemade mix that contains garden soil, pasteurize it before use.

Soil can be pasteurized very easily in your oven, says Carroll. To do so, place the soil evenly in glass or metal baking dishes so that the depth doesn't exceed four inches. Cover tightly with aluminum foil. Place a meat or candy thermometer through the foil in the center of the soil. Set the oven to 180-200 degrees Fahrenheit, and heat the soil for 30 minutes after the soil temperature reaches 180 degrees as registered on the thermometer. Allow the soil to cool and you have "clean" soil ready for use.

Pasteurized soil won't stay clean if you re-contaminate it by using pots or tools that are "dirty," cautions the pathologist. These items should be disinfected by cleaning in hot water (160 degrees F.) for 30 minutes or in a household bleach solution (1 part bleach to 9 parts water) for 30 minutes. Always use a freshly-made bleach solution and clean items as thoroughly as possible before soaking.

In addition to these sanitary measures, it is important to grow seeds and seedlings under conditions that discourage damping-off. Don't sow seed too thickly or too deep. Seeds of some plants can be sown right on the surface and covered lightly with sphagnum moss. Water soil only lightly—excess moisture favors damping-off fungi—and place in a warm location until seedlings emerge.

When seedlings are up, they should still be watered sparingly. And when they are ready to transplant, take care again to use clean soil or planting mix and equipment. Make sure the transplanting soil drains well. Don't over-water or over-fertilize, since these practices will encourage diseases.

If you follow these steps, says Carroll, you should have early plants that are vigorous and healthy—ready to perform well in your flower or vegetable garden.

Winter

Winter in the Northern Hemisphere commonly occurs during December January, and February June July, and August are the winter months in the Southern Hemisphere

Record Crowd Attends Annual Dairy Conference

Although freezing temperatures and the threat of snow made Tuesday rather bleak, a number of Lancaster County dairymen and their families assembled at the Guernsey Pavilion for the 10th Annual Southeastern Dairy Conference.

"Efficiency - A Must" represented the theme of the conference with speakers emphasizing the need for all types of efficiency in the dairy farming business.

First speaker on the morning's program was Jerry Schaffer, Agricultural Consultant for the Pennsylvania Power and Light Company. Schaffer presented a slide program organized in three portions. The first part of Schaffer's program explained the actual making of electrical power by coal and nuclear methods with the second portion emphasizing the different methods of conserving energy on the farm. The final portion explained the company's attempts to utilize solar energy as a means of conserving the natural resources.

Miles R. McCarry, Director of Agricultural Relations for Curtiss Breeding Service was second of the featured speakers for the day.

A large number of dairymen attended the 10th Annual Southeastern Dairy Conference. Charles Ackley (left) Adult Education Advisor for the Ephrata Schools served as guest master of ceremonies with the keynote speech being delivered by Eugene C. Meyer, managing editor of Hoard's Dairyman.

McCarry also presented a slide program and related the need for sound dairy animals as a means of efficiency in the dairy herd.

"Each year we strive for more production and require more efficiency also," he explained.

"Dairy cows don't have to look like water buffaloes," he stated, "with the use of many sires to correct deficiencies we can have good looking and better producing animals."

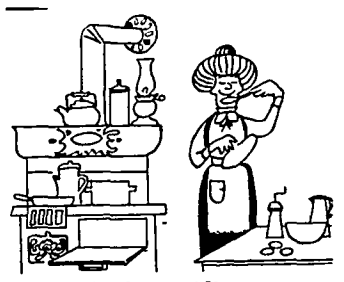
The "No-Doubt" dairy analysis program currently being offered by the Red Rose feed company was introduced by Richard Stein the territory manager for John W. Eshleman and Sons.

"More and More, With Less and Less" was the title of Dr. James R. Piotrowski's talk on efficiency at the Dairy Conference. Piotrowski is a Technical Service Veterinarian at the American Cyanamid.

Keynote speaker for the conference was Eugene C. Meyer, Managing Editor of "Hoard's Dairyman", a dairy magazine published in Wisconsin. Meyer spoke from experience having been involved in dairy herd work as a 4-H member and a college student. Meyer's travels as editor have taken him on many tours of dairy herds along with the work he currently devotes to the magazine's dairy herd in Wisconsin.

Charles Ackley, Adult Farmer Instructor for the Ephrata Area School District served as guest master of ceremonies for the program.

Along with the featured speakers, booth exhibits were provided by the following companies: American Cyanamid, Commonwealth National Bank, Cropstore Systems, Electrogen, Inc., Frey Brothers, Benny Haines, Kendall Milk Filters, Merck and Company, Penn Jersey Harvestore, Charles Pfizer, Pioneer Hi-Bred Inc., Production Credit Services, Rockland Chemical Inc., Stanford Seed Company, Tuco Products Company, Weaver Star Silo, Caleb Wenger's and Black and White Holstein Farm.



Indian Pudding

For this early American favorite, heat 3 cups milk until bubbles appear, remove from heat Stir in a small bowl ⅔ cup enriched cornmeal, ¼ teaspoon salt, one cup unheated milk Pour into scalding hot milk, stirring constantly Bring to boil over moderate heat, stirring constantly—cook 5 minutes or until thickened Beat large egg, stirring hot cornmeal mixture into egg Stir egg mixture back into rest of cornmeal mixture, add ½ stick butter, ½ cup dark molasses and ¼ cup sugar Pour into buttered 1½ quart casserole, set into baking pan with hot water within inch from top, bake uncovered in preheated 275 degree oven for about three hours

Protect Pets From Coccidiosis

By Robert L. Stear, D.V.M.
Manager of Veterinary Services
Norden Laboratories

Intestinal parasites such as roundworms, hookworms and tapeworms attack a large percentage of American pets every year. Puppies and kittens are especially susceptible.

One of the more serious parasitic diseases is coccidiosis. It is caused by tiny protozoa called coccidia. Although too small to be seen by the human eye, these creatures invade the small intestine of young animals and destroy tissue as they multiply.

Poor sanitation is the prime cause of coccidiosis. An unclean, overcrowded and damp environment where animal feces are allowed to ferment can mean serious trouble for young animals. If the feces — particularly the feces of older animals — contain parasite eggs or larvae, and the young animals swallow some of them along with their food and water, they could easily become infected.

The symptoms of coccidiosis are frequently confused with those of other intestinal diseases. Chronic diarrhea (often with blood) is the key sign. Besides this, the animal becomes listless, its eyes appear sunken, and it has little appetite. There is usually a great loss of body fluid as well, resulting in dehydration. In more severe cases, the pet may exhibit cold symptoms along with a slight fever. Coccidiosis is quite serious in cattle and sheep and is often fatal in puppies and kittens. Many pets die each year because their owners treat the disease improperly or because proper treatment by a veterinarian is delayed.

There are two basic kinds of parasite control on dogs and cats. One is preventive, the other is treating the disease after it occurs.

Prevention is largely the pet owner's responsibility. This includes establishing and maintaining strict sanitation, carefully supervising food habits, and maintaining adequate control over the animal's whereabouts. Prevention means keeping your pet's quarters clean and maintaining dry runways or washed surfaces. such as concrete which are exposed to sunlight. Shaded, moist earthen areas make poor pet quarters, since they encourage parasite breeding — especially during warm weather. By controlling environmental conditions, your pet's infection potential will be reduced considerably.

Medical treatment is the responsibility of your veterinarian, so call him immediately if you recognize the warning signs of coccidiosis. Describe the symptoms, and be ready to take your pet in for an examination. In the meantime, keep your pet quiet and comfortable. Above all, don't attempt home cures. Haphazard administering of medicines you happen to have around and think might be useful could worsen the condition. Dosages must be individually determined on the basis of age, weight and general conditions of the animal.

xxx

Dr. Stear regrets that he is unable to personally answer letters from pet owners. He suggests that readers consult their own veterinarians when their pets have problems.

AGWAY

like to boost your milk income $60 or more per cow, per year?

16-week study shows a free Agway TDR Profile (a $15 value) can help you do it!

For the study, Agway selected 14 herds totalling 338 Holsteins in the first to 185th day of lactation. Each herd was randomly divided into equal groups: half the herd continued on its regular feeding program, the other half received a ration based on the Agway Total Dairy Ration (TDR) balanced feeding program.

Cows fed under the TDR program increased production by an average equalling 511 pounds per cow per year. And feed efficiency was improved - less grain was fed to produce a pound of milk. In dollars, this means an improved net annual income of $65.70 per cow. Or with 50 cows milking, a greater annual profit of $3,285.

Using the free Agway TDR Profile (and the results of a forage test) you and your Agway Enterprise Salesman can expect to achieve comparable results . . . balancing out your homegrown feedstuffs with Agway Ratio:Right® feeds to assure your cows the right milk-making intake for top production over feed costs.

A free TDR Profile plus Agway Ratio:-Right® feeds can get you back on the road to a profitable operation. Don't wait, call Agway today.

DAIRY, LIVESTOCK, CROPS, PRODUCTION AND MANAGEMENT MEETING, TUESDAY, FEBRUARY 11, 1975

AT THE NEW HOLLAND FIRE HALL, NEW HOLLAND, PA.
FROM 10 A.M. TO 3 P.M.
